May 2, 2022

Dr. Heather Mueller Commissioner of Education Minnesota Department of Education 400 NE Stinson Blvd. Minneapolis, MN 55413

Subject: Proposal for Review and Comment

South Washington County Schools, ISD #833

Dear Commissioner Mueller,

In accordance with Minnesota Statute 123B.71, South Washington County Schools (SoWashCo Schools), ISD #833, hereby submits this proposal for district facility and site improvements for your review and comment.

The School Board of SoWashCo Schools, by unanimous vote at its meeting on April 21, 2022, directed the administration to prepare and submit this project proposal for review and comment to the Department of Education.

The proposed project will allow the district to implement additions, renovations, and site improvements at our elementary, middle and high school campuses, as well as the construction of two new replacement elementary school facilities. The construction will allow the district to respond to significant projected student enrollment, educational needs for all learners, and improved facilities for the community. This is a well-planned long-term solution both fiscally and operationally. The planned projects will allow SoWashCo Schools to invest wisely in our current capital assets and meet the long-term space needs for students and staff.

Funding for the projects will be provided by general obligation bonds, for which the district will seek voter approval in a referendum on Aug. 9, 2022. The project will be presented as a single-question ballot in the amount of \$462,660,000, including bond issuance and other associated financing costs.

Specific details regarding the district, the facility and site needs, the project scope and cost and the finance plan are included in the enclosed proposal for your review and comment.

For additional information or any questions, please feel free to contact me at your earliest convenience. On behalf of SoWashCo Schools, I thank you in advance for your consideration of this proposal, and I look forward to your response.

Sincerely

Julie Nielsen Superintendent

Cc: SoWashCo School Board

Julie Nielsen

#### INTRODUCTION

In accordance with Minnesota Statute 123B.71, the Board of Education of ISD #833 submits the following educational facilities proposal for review and comment. This proposed building project will address current and long-term needs focusing on student growth (please see attached enrollment projection in **Appendix B**), teaching and learning program space needs, outdoor learning facilities, community-use space, operational efficiencies, and other existing facilities and site improvements for all students in PK-12 for ISD #833.

South Washington County Schools has and is experiencing significant student population growth, in many parts of our District, over recent years and has reached building capacity at a number of its elementary, middle school, and high school grade buildings. In anticipation of this continued enrollment gain, the District has been planning for several years to develop long-term facility solutions to meet this population growth and other identified facility needs.

Over the past few years, a team of district administrators, consultants, and community members has been in planning to develop the following goals:

- Ensure adequate classroom space at all grades because of our fast-growing communities.
- Space for early learning, special education, alternative high school, and operational facilities
- To achieve the best possible learning environments for students.
- Design equitable learning spaces at the elementary, middle, and high school levels.

Board approved goals for the creation of a 10-year facility plan that addresses:

- Enrollment increases from new construction or changing of boundaries
- Modernization of classrooms space
- Needed renovations such as elementary bathrooms
- Curriculum and instructional delivery methods
- Transportation facility needs
- Alternative high school space
- Operational facility needs
- Early learning programming
- Special Education programming
- How buildings/schools will be repurposed
- Creation of a funding plan to address the cost of the 10-year facility plan, which will include bonding, lease levies, and long-term facility maintenance revenue
- Creation of learning spaces that support:
  - College and career-ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - o instruction styles and accommodate multiple forms of collaboration

The School Board of ISD #833 has taken the findings of the community-based long-range planning committee, as well as consideration of input from administrative leaders and consultants, under deliberation to formulate and propose implementation of projects to meet the District's long-term facility needs. As a result, at its meeting on April 21, 2022, the Board of ISD #833 voted to authorize District Administration to submit to the Minnesota Department of Education a facilities proposal for review and comment, in accordance with the scope, cost, and purpose as detailed further in this document.

The information presented in this proposal documents the need and feasibility for this project, as well as the scope, cost, timing, and funding analysis for its implementation.

# **SUMMARY OF PROPOSED PROJECT: (See Supplementary Information - Appendix G) Elementary**

- Construction of classroom additions to meet enrollment growth
- Renovation of bathrooms
- Update and improve kitchens
- Renovation of early learning classrooms
- Improvements to SPED spaces
- Create shared learning spaces for student collaboration
- Two new academically improved and enlarged replacement elementary schools to assist with growth in these boundary areas (Pine Hill and Crestview Elementary School)

#### Middle School

- Construction of classroom additions to meet enrollment growth
- Expansion of cafeterias and kitchens serving areas to serve additional students
- Site improvements for parking, traffic flow, and play areas

# **High School**

- Construction of classroom additions to meet enrollment growth
- Expansion of cafeteria and kitchens to serve additional students
- Creation of multipurpose space for online learning
- Enhance CTE programs
- Re-locate the Alternative High School program to a drastically improved learning environment.
- STEM spaces
- Site improvements for parking, traffic flow, and athletic areas

#### **Transportation**

 Construction/expansion of the transportation and operation center to provide adequate space for busses and vehicles as a result of recent growth

#### **Support Sites**

- Convert Crestview Elementary School into Alternative HS Learning Center and District operation offices
- Convert Newport Elementary School into SOWASHCO Early Learning Center
- Renovate District Service Center into Transition Program Center; District Service office move to new Crestview Elementary School
- Purchase land for new elementary school and future new high school

# 1. GEOGRAPHIC AREA AND STUDENT POPULATION

GEOGRAPHIC AREA AND POPULATION TO BE SERVED, PRESCHOOL THROUGH GRADE
12 AND STUDENT ENROLLMENTS FOR THE PAST FIVE YEARS, AND STUDENT ENROLLMENT
PROJECTIONS FOR THE NEXT FIVE YEARS.

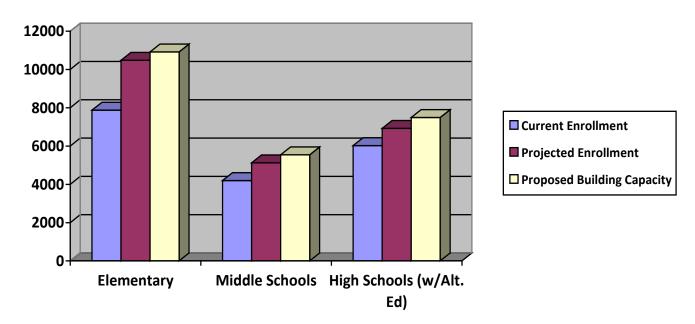

So. Washington County Schools, ISD #833, is located approximately 12 miles east of the St. Paul metro area, ranging from State Highway 94 to 494 to Co. Rd. 61 in the cities of Cottage Grove and Woodbury, MN. ISD #833 currently serves approximately 20,000 students in its K-12 grade learning programs.

A school district map is included in **Appendix A** of this document.

According to a recent demographic study (*Davis Demographics*), South Washington Schools is projected to have significant growth in student enrollment over the next 10 years, but with some geographic shifting in student population location.

Please note, the capacity of many of the elementary schools are a reduced by a total of 805 students; Schools such as Armstrong, Hillside, Middleton, Red Rock, Royal Oaks, Valley Crossing, and Woodbury capacities are reduced because of existing classrooms being repurposed into restrooms, flex learning spaces, and/or SPED. In addition, Newport Elementary School is repurposed as an early childhood center. Capacity is increased at elementary schools that will be consistent with boundary changes and enrolment growth areas. This increased elementary growth occurs at Bailey, Cottage Grove, Crestview (larger replacement school), Grey Cloud, Liberty Ridge, Pine Hill (larger replacement school), and Pullman.

District enrollment history and enrollment projections are provided in **Appendix B** of this document. The chart below indicates current enrollments, projected enrollment in the next 10 years, and proposed building capacity for future growth.

# 2. EXISTING FACILITIES

A LIST OF EXISTING SCHOOL FACILITIES BY YEAR CONSTRUCTED, THEIR USES, AND AN ASSESSMENT OF THE EXTENT TO WHICH ALTERNATE FACILITIES ARE AVAILABLE WITHIN THE SCHOOL DISTRICT BOUNDARIES AND IN ADJACENT SCHOOL DISTRICTS.

ISD #833 currently owns and operates 27 buildings that serve its PK-12 learning programs and district operations.

The District is configured as three (3) 9-12 grade high schools, four (4) 6-8 grade middle schools, and sixteen (16) K-6 elementary schools.

Below is a summary of the current District-owned facilities with the educational configurations and building sizes:

# 3. ANTICIPATED NEEDS FOR FACILITIES

A LIST OF THE SPECIFIC DEFICIENCIES OF THE FACILITY THAT DEMONSTRATE THE NEED FOR A NEW OR RENOVATED FACILITY TO BE PROVIDED, AND A LIST OF THE SPECIFIC BENEFITS THAT THE NEW OR RENOVATED FACILITY WILL PROVIDE TO THE STUDENTS, TEACHERS, AND COMMUNITY USERS SERVED BY THE FACILITY.

# **SPECIFIC DEFICIENCIES:**

- 1) In the Supplemental information, you will find more specific information for your review. Following is a summary of these <u>deficiencies</u>:
  - a. Elementary
    - i. Adequate classroom space for new students due to the significant growth ISD #833 is experiencing
    - ii. Pre-K classroom spaces
    - iii. Restroom spaces in our older buildings
    - iv. Special education spaces to meet today's needs
    - v. Cafeteria and kitchen spaces in some of our buildings that are too small or not adequate to prepare and serve lunches
    - vi. Collaboration/flex learning spaces for our early learners
  - b. Middle Schools
    - i. Adequate classroom space for new students due to the significant growth ISD #833 is experiencing
    - ii. Cafeteria size for the number of students
    - iii. Traffic and parking areas
  - c. High Schools
    - i. Adequate classroom space for new students due to the significant growth ISD #833 is experiencing
    - ii. Cafeteria and kitchens spaces are too small for the number of students
    - iii. Need better car, bus drives, and parking
    - iv. Lack of flexible learning space
    - v. STEM space needs
    - vi. Lack of CTE space and programs
    - vii. Support spaces with a growing student body
    - viii. Secured entrance needs
  - d. Transportation
    - i. The facility needs and size of the current transportation are not adequate to meet our growing needs, and the number of busses the District currently owns
  - e. Support Sites
    - Increase in staff over the last decade (and still growing), we have outgrown the District Service/Program Center
    - ii. Significant lack of storage space for files and equipment

# **SPECIFIC BENEFITS:**

# **Educational Learning Benefits**

The proposed project scope will result in direct <u>educational benefits</u> as follows:

- 1. The space shortages for the growing student population will be remedied by the construction of the two new larger replacement elementary schools, additions, remodeling, and balancing the student population
- 2. Kitchen and cafeteria expansion or remodel will help ISD #833 better serve breakfast and lunches to the students
- 3. SPED will be improved at many of our buildings because of the new or remodeled spaces
- 4. STEM or similar programs will better serve all students
- 5. Flexible / multi-use space to help students learn
- 6. CTE Space to better serve career readiness programs

# **Community Benefits**

- 1. The proposed projects will result in better and safer access to buildings and sites. Improved drive and parking areas at many of the buildings.
- 2. Community spaces such are restrooms, cafeterias, media centers, etc. will be enhanced in many of our buildings
- 3. Relocation and improvements to the District Service Center and Program Center will improve the services we offer to the parents, staff, and community

# **Operational Benefits**

1. Added educational spaces will help keep classroom sizes down and improve student-teacher ratios.

# **Building Maintenance Needs:**

ISD #833 has always been diligent in the care of its school buildings and sites. However, as these capital assets age, critical building and site components wear out and need repair or replacement. To respond to specific facility maintenance needs, the District intends that a portion of this proposed project address some of these District-wide items.

#### 4. CONSTRUCTION PROJECT DESCRIPTION

PROVIDE A NARRATIVE DESCRIPTION OF THE PROJECT, INCLUDING THE SPECIFICATION OF SITE AND OUTDOOR SPACE ACREAGE AND SQUARE FOOTAGE ALLOCATIONS FOR NEW AND CONVERTED CLASSROOMS, LABS, AND SUPPORT SPACES. INCLUDE A FLOOR PLAN OF THE PROJECT, IF APPLICABLE. SPECIFY ESTIMATED EXPENDITURES FOR THE MAJOR PORTIONS OF THE PROJECT, AS WELL AS ESTIMATED CHANGES IN FACILITY OPERATING COSTS. PROVIDE DATES THE PROJECT WILL BEGIN AND BE COMPLETED.

# SUMMARY OF PROPOSED PROJECT:

See **Appendix G** for project descriptions. Additionally, the following is a breakdown by building, project, and associated costs: Please note, with issuance cost included, the total bond question is \$462,660,000 (see **Appendix C and F**).

Review and Comment April 21, 2022 (submittal)

Bond Referendum August 9, 2022

Design Phase (Multi-phased) Please see Appendix E

Bid & Award Please see Appendix E

Construction Phase Please see Appendix E

Commissioning Is planned for each project

Occupancy Phased

# **OPERATING COST IMPACT:**

The proposed projects will result in additional square footage of buildings for the District to operate and maintain.

The natural gas and electricity – to heat, cool, ventilate, power, and light, the additional square footage is estimated at \$.85 per SF annually.

The District anticipates that the additions will require additional teachers, support and custodial staff, and other maintenance supplies and expenses. See the chart below:

		Teac	Added ching/Support Staff		d Janitorial & Exterior aintenance	
Number of New Teachers / Support Staff			140	15		
Average Staffing Cost Per Year	Per Year		100,000	\$	45,000

#### FINANCING / TAX IMPACT

A specification of the source of project financing, including:

- a. applicable statutory citations,
- b. the scheduled date for a bond issue or school board action,
- c. a schedule of payments, including debt service equalization aid, and
- d. the effect of a bond issue on local property taxes by property class and valuation.

South Washington County Schools ISD #833 proposes to obtain financing from the sale of General Obligation bonds. The School District would seek voter approval of a **single ballot question** on Tuesday, August 9, 2022, pursuant to Minnesota Statutes Chapter 475, which, if approved, would result in a bond issue totaling **\$462,660,000**. Underwriter's discount and cost of issuance are estimated at \$3,602,928. The difference between the amount requested to be authorized by the voters, plus the estimated interest earnings in the construction fund of \$3,442,928 and less estimated costs of issuing this debt equals \$462,500,000, the amount the District expects to need for construction projects.

Ehlers has prepared the following schedules, which have been included in **Appendix C** of this document:

- 1) Estimated sources and uses of funds for the proposed bond issue
- 2) Estimated debt payment structure for the anticipated bond issue and estimated annual debt service property tax levies after accounting for the 105% levy requirement and (the District does not qualify for debt service equalization aid)
- 3) An analysis of the estimated tax impact on various values of residential, commercial, and apartments/residential non-homestead properties for the proposed bond issue

#### 6. DOCUMENTATION OBLIGATING DISTRICT COMPLIANCE

PROVIDE EVIDENCE OF UNDERSTANDING AND INTENT FOR COMPLIANCE WITH MINNESOTA STATUTES, STATE CODE REQUIREMENTS, AND DESIGN STANDARDS FOR THE ANTICIPATED PROJECT WORK.

ISD #833 understands its obligation under Minnesota statutes governing municipal and public sector work, including the requirement to comply with applicable codes. It will ensure that its project architect, engineers, and contractors understand this obligation as well.

- i) Governing municipal contracts ISD #833 and its architect recognize and will be bound by all applicable provisions set forth in Minnesota Statute 471.345 governing public and municipal contracts issued for this project.
- ii) Sustainable design ISD #833 will consider and include elements of sustainable design for this project, including but not limited to Conserving Energy & Natural Resources through systems design and material selections; Minimization and Management of Construction Waste; and Optimizing Maintenance & Operating Costs through careful selection of operating systems, infrastructure components, and exterior and interior finish materials.
- iii) Facility Commissioning related to HVAC and ASHRAE standards the architects and engineers for the projects will design ventilation systems that meet or exceed current building codes, as well as ASHRAE standards for indoor air quality and air infiltration. Furthermore, the District ensures that its systems will be commissioned as required under M.S. 123B.72 governing School Facility Commissioning. The architects certify that the systems designed will meet or exceed current code standards, including the ASHRAE air filtration standard 52.1.
- iv) American National Standards Institute Acoustical Performance Criteria the architects for the projects, will consider the American National Standards Institute's S12.60 Classroom Acoustics Standards in the design of the project for addressing background noise levels and reverberation times. Meeting these acoustical standards will include consideration of enclosures, partition walls, doors, window systems, as well as the design and installation of mechanical and electrical systems, so that recommended ambient noise levels are not exceeded throughout the various frequency ranges. Interior acoustical treatments will also be used in a manner that addresses low sound reverberation levels, but increases speech clarity.
- v) State Fire Code ISD #833 and its architect recognize and are bound by all applicable code provisions set forth in the International Fire Code as adopted by the International Code Council, including those provisions found in Minnesota Rules Chapter 7511.
- vi) Chapter 326B building codes ISD #833 and its architect recognize and will comply with all applicable provisions set forth in Minnesota Statute 326B Construction Codes and Licensing governing the design and construction of this project.
- vii) Consultation with appropriate governing agencies related to project impact on utilities, roads, etc. ISD #833 and design teams will be in consultation with government units about the impact in regards to utilities, roads, sewer and water, sidewalks, improved trails, school bus and automobile traffic access, and safe access for pedestrians and cyclists. The other facilities that are part of the project scope all sit on existing sites. Furthermore, any necessary planning and approvals will be coordinated with the local municipalities, counties, and the appropriate state agencies.

The School District, ISD #833, will maintain record documentation showing compliance with the above items upon and subsequent to project completion.

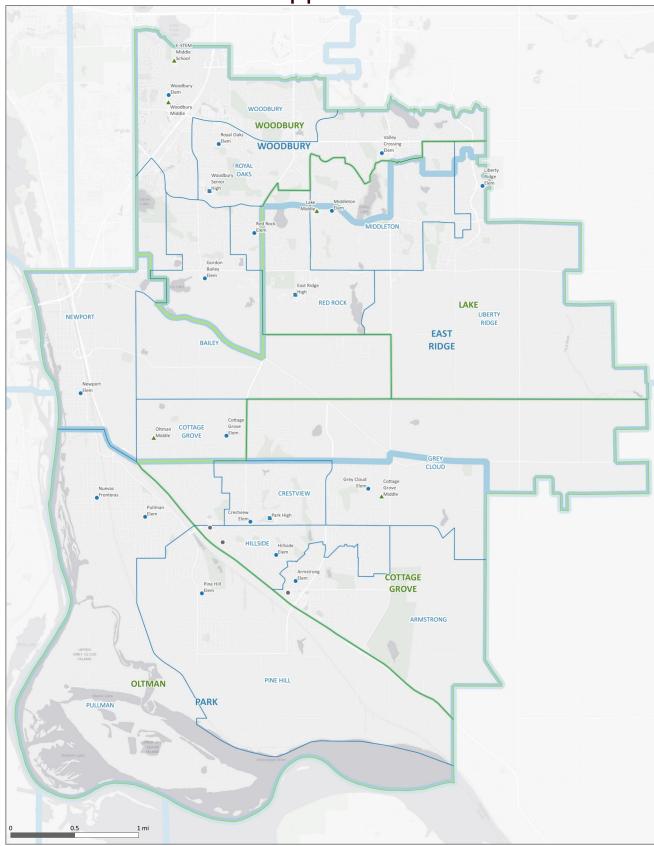

# **APPENDICES**

# APPENDIX A: SCHOOL DISTRICT BOUNDARY MAP

Created using QGIS Geographic Information System by the Open Source Geospatial Foundation Project. Basemap Credits: Esri, HERE, Garmin, © OpenStreetMap contributors, and the GIS user community.

#### **Map Information**

Public Schools

- Elementary
- Middle and Junior High Schools
- Secondary
- Other
- Elementary School Attendance Area
- Middle School Attendance Area
  High School Attendance Area

This map is intended to display a single public school district and the pertinent attendance area boundaries and public school locations. Attendance areas are only labeled if more than one exist for the district. School locations are labeled if they are classified as elementary, middle, or high schools.

The school district boundary appearing on the map does not necessarily represent the legal boundary of the district. It is a generalization of the boundary maintained by the Department of Education, based on land parcel information from Minnesota counties. Please contact your county auditor or assessor to obtain an accurate legal description of the boundary.

#### Liability Statement

The Minnesota Department of Education (MDE) does not warranty the results you may obtain by using this map. It is provided without express or implied warranties, including warranties of merchantability and fitness. In no event will MDE be liable for any consequential, incidental, or special damages, including any lost profits or lost savings, even if an MDE representative has been advised of the possibility of such damages or any other claim by any third party.

# APPENDIX B: SCHOOL DISTRICT ENROLLMENT HISTORY

& PROJECTIONS
GRADES PRE-K
THROUGH 12

#### **EXECUTIVE SUMMARY**

Davis Demographics. is assisting the South Washington County Schools to plan for future student population changes. By factoring current and historical student data with the latest demographic data and planned residential development information, Davis calculated a ten-year student population projection. This projection is based on the residence of students, not school enrollment, and is designed to alert the district as to when and where student population shifts will occur. Research and data are based on geographic reference, figures reflect the calculation of study areas that make up areas within the SWCS. This allows Davis to present existing attendance area and rezoned area information without disconnect from historical data.

#### **Key Items in the districtwide Analysis Section of the Report:**

- South Washington County Schools projected resident students are expected to increase annually for the next ten years.
  - o K-12 district-wide student population is projected to increase by >20% over the ten- year projection period resulting in a potential net growth of >4,000 students.
- There are >40 different residential development projects actively under construction or currently planned within South Washington CS boundary that will be the driving force for SWCS growth. There could be an additional nearly 4,000 single family and more than 3,000 multifamily units constructed in the next decade.
  - Over half of the development in the district falls within the Bailey ES and Grey Cloud ES zones at 23% and 32% respectively. The Cottage Grove ES, Liberty Ridge ES, and Pine Hill ES zones house a significant portion of the development with a combined 35%.
  - o 38% of the residential development falls within the Cottage Grove MS (~2/3 of which is multifamily), 12% within Lake MS, 44% within Oltman MS and Woodbury Middle with by far the smallest residential development at 6% within in its attendance zone.
  - The majority (60%) of residential development falls within the East Ridge HS zone, with 34% within Park HS and 6% within Woodbury HS attendance boundaries.
- Over 4,000 new students could be expected from the active and planned residential developments, however some growth is offset by attrition occurring in several existing neighborhoods.
- SWCS has higher than average mobility rates indicative of strong retention of existing students and collection of newer students from existing homes.

# SECTION ONE - METHODOLOGY Sources of Data

#### **Geographic Map Data**

Five geographic data layers were modified or created for use in the ten-year student population projections:

- 1. Street Centerline Database
- 2. Study Areas
- 3. Schools
- 4. Students Historical and Current
- 5. Planned Residential Development

#### 1) Street Centerline Data

The main function of the street centerline data file is in the geocoding process of the student data. The geocoding process places a point on the map for every student in the exact location that student resides. Each student is geocoded to the streets by their given residence address. This enables Davis to analyze student data in a geographic manner. Another vital utilization of the digital street database is in the construction of study areas. Freeways, major streets, and neighborhood streets are generally used as boundaries for the study areas.

# 2) Study Areas

Study areas are small geographic areas, like neighborhoods or portions of neighborhoods, and are the building blocks of school district attendance areas. Study areas are geographically defined following logical boundaries of the neighborhood such as freeways, streets, railroad tracks, or green space. Each study area is then coded with the corresponding elementary, middle and high school that the students in the area are assigned to attend. By gathering information about the district at the study area level, Davis and the district can closely monitor growth and demographic trends in particular regions and identify potential need for boundary or facility adjustments. Currently, 637 study areas make up the South Washington CS boundary.

#### 3) Schools

School facility information including school name, address, unique identifying code, grade ranges, and permanent capacity were provided to Davis by district staff.

# 4) Student Data

- **A. Historic Student Data** Historic population data is used to compare past student population trends as well as the effects of mobility (student movement in or out of existing housing) throughout the district. The data from previous years served as the basis for calculating student Mobility Factors.
- B. Current Student Data A student data file representing student membership as of October 2018 was provided to Davis by district staff. This data was summarized by grade level and each student was located by residential address to identify current study area populations. This data is used as a base for student population projections. The projections run each of the next ten years from SY2019/20 through SY2028/29. These projections were updated with current data in November of 2021 to extend forecasts through SY2031/32.

C. Student Accounting - The Student Accounting Summary (Table 2) indicates the total student enrollment as of Fall 2018 and the number of students used in the ten-year student population projections. The projection model is based upon student residence and typically excludes students residing outside of the district's boundaries.

# Table 2: Student Accounting Summary

# School Year 2018-19 Actual Enrollment (Representing Fall 2018)

Total Students Provided by District File (January 25, 2019)	19,664
Out of District Students	-563
Unmatched	-12
Pre-Kindergarten	-994
Early Education	-268

# **RESIDENT K-12 STUDENTS USED IN THE PROJECTIONS**

17.803

D. Current Student Composition – The SWCS Fall 2018 student data file consisted of 19,664 records with fields including Grade and School. Student data was limited to addresses, grade and school. Fields SDC, ELL, FRAM, Disability, Language, Service Level, Ethnicity, Transfer Code, and AP were left blank by district student information system managers.

#### 5) Planned Residential Development

This data was obtained through discussions with district staff, city and county agencies, and major developers within the district boundaries. Davis visited residential development sites to verify construction status, update phasing, and review information with SWCS. This data includes development name, location, housing type, total number of units of development, remaining number of units in development and project phasing (projected move in dates). The phasing for planned housing development is factored into the ten-year projections (see SECTION TWO for a detailed listing of the planned residential development). In the student population projection, Davis includes all approved developments and those developments under review in addition to any planned or proposed development that possibly will occur within the projection timeframe.

The planned residential development information and phasing estimates are a snapshot of the district at the time of this study. Because this information is subject to changes in the marketplace, this data should be reevaluated annually. Davis Demographics and South Washington CS are monitoring projects closely. Davis has created an online application for the district to use in the verification process throughout the year. This application [ArcGIS & SchoolSite] were updated with current residential development from city officials in November 2021 for the current presented projections.

#### **Data Used for Variables**

Three sets of data were compiled and reviewed for use in the ten-year student population projections by residence:

- 1. Births by Zip Code
- 2. Mobility Factors
- 3. Student Yield Factors

#### 1) Live Births Data

Live births data by city (roughly correlated to cities within South Washington County Schools boundaries) was obtained from the Minnesota Department of Health for the years 1999-2017. Past changes in historical birth rates are used to estimate future incoming kindergarten student population from existing housing. Birth rates were further analyzed at regional levels within the district and then applied to the planning areas.

# 2) Mobility Factors

Mobility refers to the increase or decrease in the movement of students within and out of the district boundary. Mobility, which is essentially a modified cohort, is applied as a percentage of increase/decrease among each grade for every year of the projections.

# 3) Student Yield Factors (SYFs)

Student Yield Factors (sometimes referred to as "Student Generation Rates") were calculated from a housing count of existing residential units throughout the district. This survey includes four main housing types: single- family detached Single-Family Detached (SFD), Single-Family Attached (SFA), Multi-Family Attached (MFA), and Apartments (APT). This can be revisited for more housing types in the future if these projects are filed and approved.

The student yield factors, combined with planned residential development units, are used to determine the number of students potentially generated from new residential housing development projects. Student Yield Factor calculations will be discussed again in the Ten-Year Projection Methodology section.

# **Projection Variables**

Each year of the projections, 12<sup>th</sup> grade students graduate and continuing students progress through to the next grade level. This normal progression of students is modified by the following factors:

#### **Incoming Kindergarten**

Live birth data is reported to the Minnesota Department of Health by city of the mother. Davis uses the birth data by city roughly correlating to the district boundary and applies the data accordingly. For estimating incoming Kindergarteners, Davis used reported statistics for each recorded municipality in the district.

The assumption underlying the use of birth statistics from year to year is that increases or decreases in the number of births in the area will translate to increases or decreases in future kindergarten enrollment. Incoming kindergarten classes, for existing homes, are estimated by comparing changes in past births in the area. Davis assumes the current kindergarten class was born five years prior in 2013. Future incoming kindergarten classes are estimated by comparing the number births in 2013 to the number of births in 2014 through 2017. Davis compared the total births in 2013 to the total births in 2014, to determine a factor for next year's kindergarten class (SY2019/20). The 2013 births were compared to 2015 (SY2020/21 K class), 2013 to 2016 (SY2021/22 K class), and 2013 to 2017 (SY 2022/23 K class).

Chart 1, below, shows the correlation of the number of children being born in the district to the actual number of students in the district's Kindergarten counts five years later.

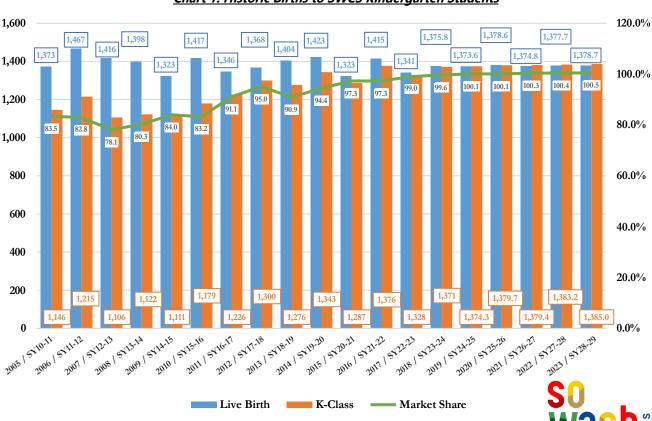

Chart 1: Historic Births to SWCS Kindergarten Students

Davis used reported statistics for each recorded municipality in the district and listed the live birth counts from 2005 through 2017. The 2005 to 2012 data is not used in the actual birth rate calculations, but more for historic reference.

- 1. To calculate the birth rates that would be used to determine the incoming kindergarten class for SY2019/20, Davis compared the 2014 live birth counts (representing the future SY2019/20 K class) and compared them to the 2013 counts.
- 2. Since the future students representing SY2023/24 through SY2028/29 (2019 to 2023 births) are not yet born, Davis had to take certain steps to determine the birth factors used for SY2023/24 through SY2028/29. Davis used a linear trend model of the previous four years of birth rates to create the last six years birth rates. This was done to avoid over or under projecting the number of new kindergarteners in the final years of the projection and is a very common practice.
- 3. Births in the South Washington CS have been fluctuating between 1,320 to 1,420 (Table 3). The district appears to register approximately the same number of children who were born five years earlier.

**Base** 0.942 1.008 1.014 0.955 0.980 0.978 0.982 0.979 0.981 0.982 Year 2022 2023 2025 2018 2019 2020 2021 2024 2026 2027 2028

**Table 3: Birth Factors (District)** 

# **Student Mobility Factors**

Student mobility factors further refine the ten-year student population projections. Mobility refers to the increase or decrease in the movement of students within and out of the district boundary (move-in/move-out of students from existing housing). Mobility Factors consider apartment movement within the district, housing resales, foreclosures, movement out of the district, and high school dropout rates. Mobility, like a cohort, is applied as a percentage of increase/decrease to each grade for every year of the projections.

A net increase or decrease of zero students over time is represented by a factor of **1.00** or a 100% pass through rate. A net student loss is represented by a factor less than **1.00** (such as .97 or a -3% net loss) and a net gain by a factor greater than **1.00** (such as 1.04 or a 4% net increase).

Example: X 1.04 (Armstrong ES 1st grade mobility)

= 104 1st grade students in SY 2019

The sampling used to calculate student mobility was taken over a four-year period using "address matched" (located by place of residence) student data from SY2015/16 through SY2018/19 for individual grade comparisons. For example, a comparison was made for the SY2015/16 Kindergarten student population to the SY2016/17 1st grade students; the same for SY2015/16 1st graders to SY2016/17 2nd graders, etc. This comparison was also conducted through 12th grade and for the following school years: comparing SY2016/17 students to SY2017/18 students and comparing SY2017/18 student data to SY2018/19 students.

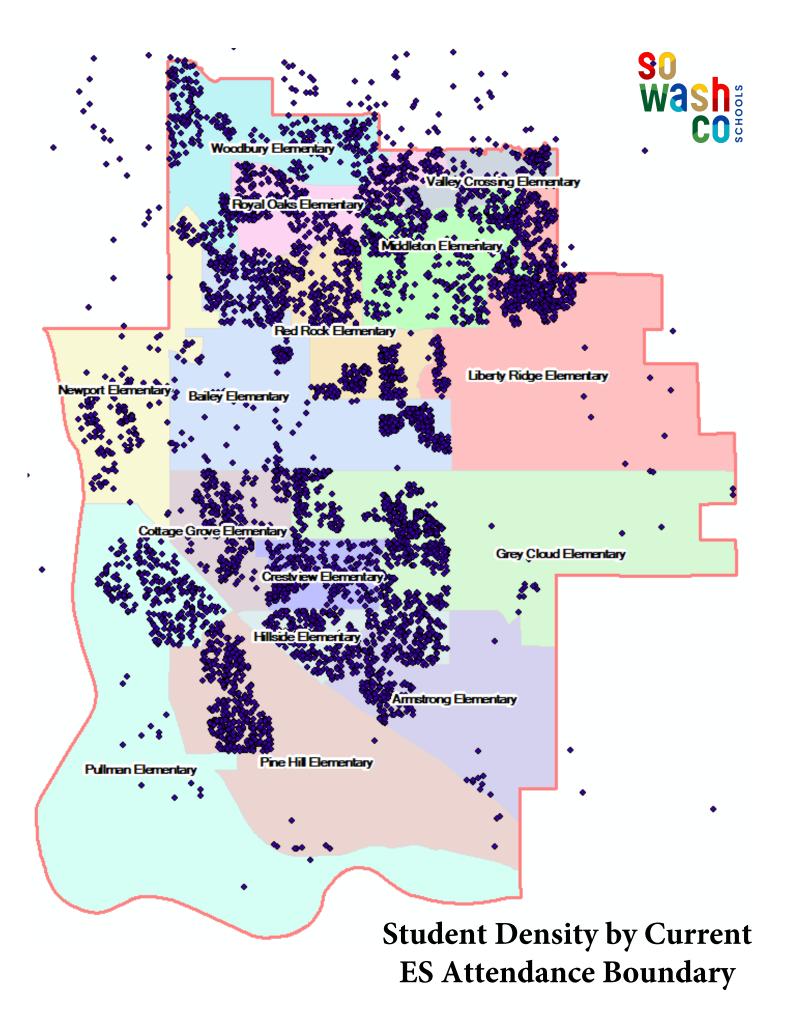

There are a few main reasons for using the last four years of data and not using more or less years for the Mobility Study. If student data going back too far (5+ years) is used, then specific trends that were occurring during that time that are not occurring in now will be factored into the projections and therefore not reflect the most recent patterns. If only the last few years of student data (i.e. SY2017/18 and SY2018/19 only) are used, then isolated anomalies occurring in the district (sharp rise or decline in the student population) would then be overrepresented in the ten-year projections. Davis's experience has shown that using the last four years of data and averaging the three years of change provides a more balanced and accurate mobility trend for ten-year student projections.

Having historical student data categorized by Study Area is extremely helpful in calculating accurate Student Mobility Factors. For this year's report, Davis used current elementary school attendance areas as the basis to calculate Mobility Factors. In other words, 15 sets of Mobility Factors were used to calculate student projections (listed in Table 4), using these, smaller geographic areas help to identify and focus on trends within the district. Focusing Mobility Factors at the Elementary Area instead of the entire district will help to refine those changes by neighborhood and better assist in forecasting projections.

The advantage to running the Mobility Factors at the attendance area level rather than looking only at a districtwide average is that you can focus on specific trends that are occurring in specific neighborhoods, which can lead to more accurate projections. Remember, the Mobility Factors are summaries of school attendance areas and those neighborhoods within the areas. This intensive study will allow the district to review forecasted figures at the smallest level – the study area.

**Table 4: Mobility Factors** 

Elementary Zone	1st Grade	2nd Grade	3rd Grade	4th Grade	5th Grade	6th Grade	7th Grade	8th Grade	9th Grade	10th Grade	11th Grade	12th Grade

# **Student Yield Factors (SYF)**

The Student Yield Factors, when applied to planned residential development units, determine how many additional students will be generated from new construction within the district (see SECTION TWO for details on planned residential development).

Two sets of data are required to calculate Student Yield Factors: a current student file (provided by the district) and current housing unit data (taken from information provided by the Washington County). The two database sets, students and housing units, are then linked. This allows Davis to associate each student with a specific housing unit. For the district, four general categories of housing units were analyzed; Single-Family Detached (SFD), Single-Family Attached (SFA), Multi-Family Attached (MFA), and Apartments (APT). These housing types make up the current planned housing types within the SWCS.

Before the housing types can be calculated from the current housing stock, the year of construction for each housing type must be determined. In general, new housing attracts families with elementary school aged children. Over the following 12 to 15 years, the children grow older and pass through the grades. A portion of those families, now without school-aged children, will then relocate and the cycle is then repeated throughout the life of the home. Identifying the year of construction and number of current resident students in recently built housing units assists in estimating the number of new students generated from future residential development.

In addition, other elements apart from the year of construction can be assessed. These elements include, but are not limited to, housing type, number of bedrooms, geographic location (study area), value of home, etc. Once all determining elements are decided upon, simple calculations are performed to produce a Student Yield Factor. The total number of units for that housing type then divides the number of current students residing in each housing type.

Student Yield Factors were created in May 2019 based on the most recent information available, one for each type of housing unit (SFD, SFA, MFA, and APT) and are shown in Table 5. All residential units built within the district were extracted from County Assessor's office data. Upon examining the results, Davis determined that the Student Yield Factors for SFD units.

Figure 1: Current Students Compared to Existing Housing

These units are located near the active or planned residential development. Davis also compared current development current student data to develop adjustments to existing factors.

Housing Forecasts Updated November 2021

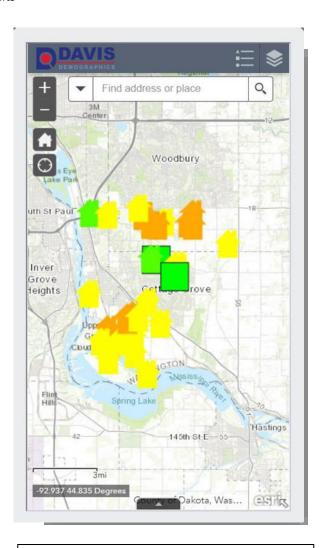

#### **Planned Residential Development**

Closely related to the Student Yield Factors are planned residential development units. Planned residential development data is collected to determine the number of new residential units that will be built over the time frame of the student population projections. The units

built within the next ten years will have the appropriate SYF applied to them to determine the number of new students the planned residential development may yield.

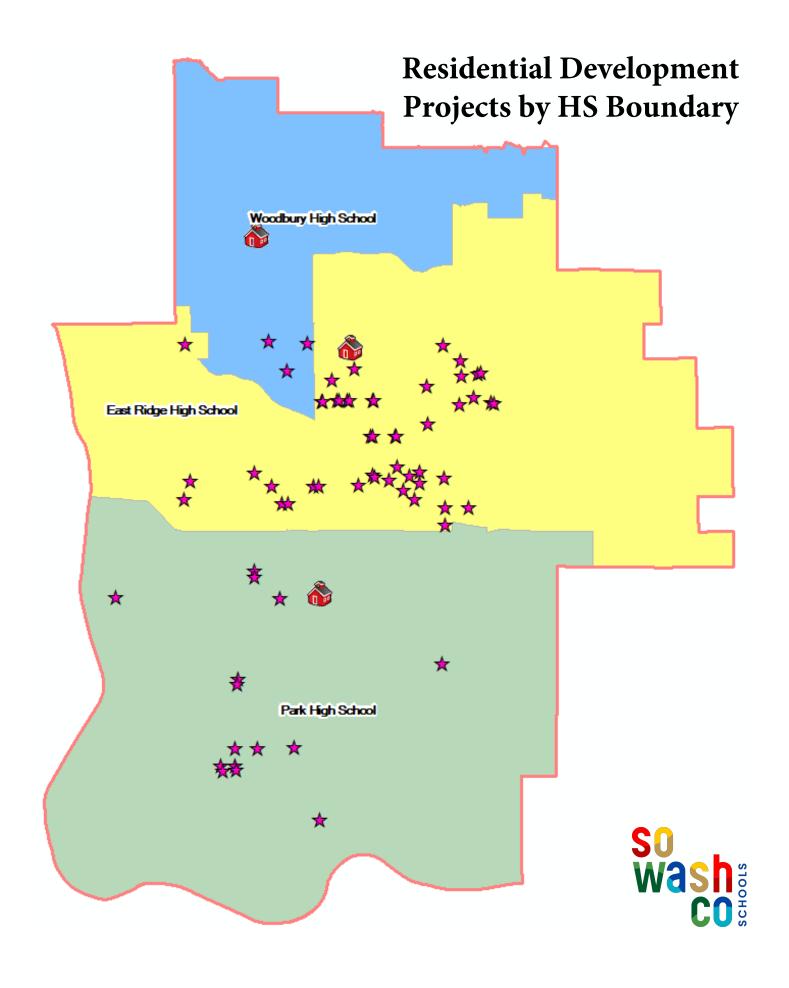

Most development data was acquired from research by Davis and additional information was obtained through discussions and meetings with District staff, and planning departments, active sales offices, and major developers within the district boundaries. Davis staff visited SWCS at several points this late May to verify project status. Online tools were developed by Davis to allow District staff to track existing information while during the research process. Data includes development name, location, housing type, total number of units and projected move in dates (phasing). Phasing for planned housing is factored into the ten-year projections. (See SECTION 2 for a listing planned detailed of the residential development).

In the student population projection by residence Davis, includes all Approved and Tentative tract maps in addition to any planned or proposed development that possibly will occur within the projection timeframe. The planned residential development information and phasing estimates is a snapshot of the district at the time of this study. Davis makes all attempts to have the most recent information used at the time of production. Because this information may change, it should be reevaluated and updated annually.

Future and Current Residential Projects Online Application

# **Applying the Variables to Generate the Projections**

The following paragraphs summarize how Davis uses the factors to determine the student population projections (see Chart 2 for a flowchart of this process). Remember that these projections are based on the residence of students and not school enrollment. South Washington CS has been divided into 637 study areas. Every study area is coded with the school code of the elementary, middle, and high school's attendance area it falls. The residential projections are calculated at the study area level. This means that Davis conducts 637 individual projections that are based upon the number of students residing in each study area.

The first step in calculating the projections is to tally the number of students that live in each study area by grade level (Kindergarten through 12<sup>th</sup> grade). The current student base (SY2018/19) is then passed onto the next year's grade (SY2018/19 K become SY2019/20 1<sup>st</sup>, SY2018/19 1<sup>st</sup> graders become SY2019/20 2<sup>nd</sup> graders, and so on). After the natural progression of students through the grades is applied, then Birth Factors are multiplied to the current kindergarten class to generate a base for the following year's kindergarten class.

Next, a Mobility Factor is applied to K-12. Again, these factors consider the natural in and out movement of students throughout the district. The mobility factor is calculated by student movement in every grade (K-12). Based on this, a unique mobility factor is applied to each elementary school attendance area determined by the mobility factor study.

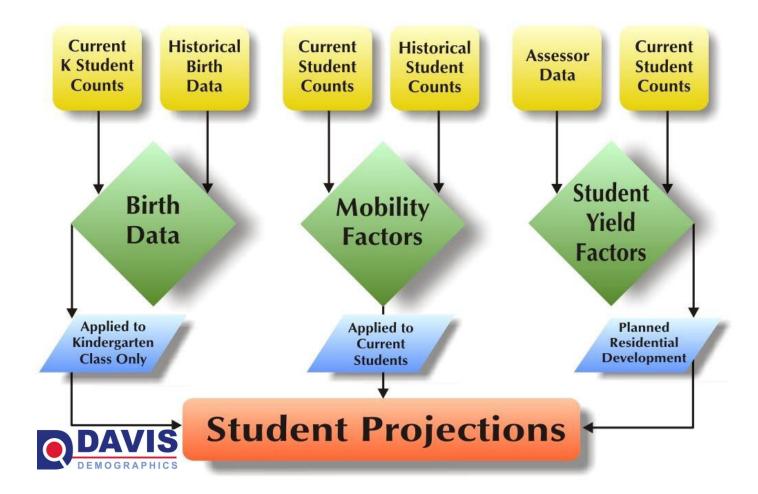

The last essential layer applied to the projections is the additional students projected from planned residential development. This is a simple calculation, again conducted at the study area level, where the estimated number of new housing units for a particular year is multiplied by the appropriate Student Yield Factor. For example, if 100 Single-Family Detached (SFD) units are to be built in a specific study area in a given year, 100 units would be multiplied by the appropriate SFD K-5 student yield factor (0.557) and the resulting number (56) would be divided evenly among K-5 grade levels.

To finish generating the projections by residence, the same process is conducted for each of the 637 study areas. Once the projections have been run at the study area level, then it is simple addition to determine projections for each of the district's attendance areas or for a districtwide summary. For example, the residential projections for the Armstrong ES attendance area is simply the summary of all the study areas that make up this specific attendance area. The district Summary for the projections is a total summary of all 637 study areas.

Current and historical students, geographic data, and non-geographic data are used to calculate the factors used in the student population projections by residence. These factors are applied using Davis's SchoolSite software and projections are calculated for each study area for each grade.

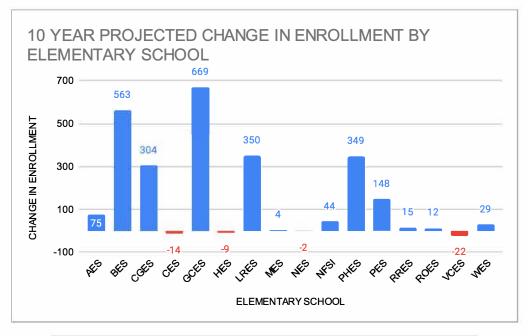

Chart 2: Projections by Residence Flowchart

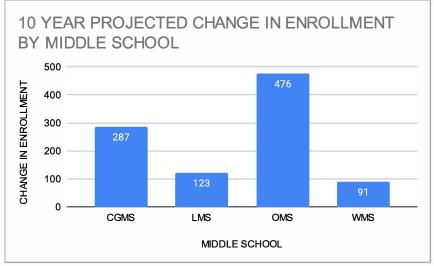

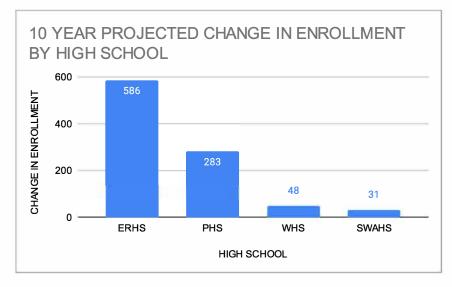

### **Enrollment Projection Deltas - 2021-2031 School Year**

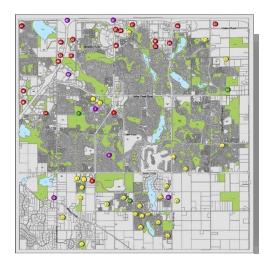

### SECTION TWO - ACTIVE OR PLANNED RESIDENTIAL DEVELOPMENT

In the student population projection by residence, Davis includes all approved and tentative tract maps in addition to any planned or proposed development that may occur within the ten-year projection timeframe. The planned residential development information and phasing estimates represent a snapshot of the district at the time of this study. As development plans are subject to change, all planned residential development data should be updated annually.

Most of the residential development data used in this report was obtained by Davis, conversations with staff from SWCS, and city planners and managers from the municipalities, as well as direct contact with developers and sales offices with current and future housing projects within the district boundaries. A database and maps of planned residential developments have been created, including, when available, project name, location, housing type, total number of units and estimated move in dates (phasing schedule). Davis has also created an online tool to help District staff to view projects and updates during the research portion of this project. Development research was an ongoing activity over the course of this demographic study.

Projected phasing is based on occupancy of the unit and is used to help time the arrival of students from these new developments. Project details are provided after each map. There are more than 40 different residential development projects actively under construction or currently planned within South Washington CS boundaries.

The occupancy dates for new housing units over the next ten years have been estimated based on either visual site inspection or by projections provided by the developer. On this summary table, Davis has also included an inventory of all known residential projects that are expected to be active over the

next ten years and is sorted by study area number. The Student Yield Factors that Davis had researched and applied towards these future units are shown in Table 5.

Washington County has been experiencing growth in the housing industry for the later part of this decade. Research indicates that this trend will continue while there are areas in the county to build and pressure for housing exists.

### SECTION 3 - PROJECTIONS - PROPOSED BOUNDARY, CONSTRUCTION AND PROGRAM CHANGES

To accommodate ongoing facility needs; South Washington County Schools has assembled a proposed long-range facilities package to address growth, but also essential instructional, operational and support needs throughout the district. These needs will be addressed through a combination of boundary changes, program moves and realignments, building re-purposing, utilization of exiting space in under capacity schools and new construction of facilities in more appropriate locations. This package was assembled under the framework of a Board-Approved set of guiding change principles.

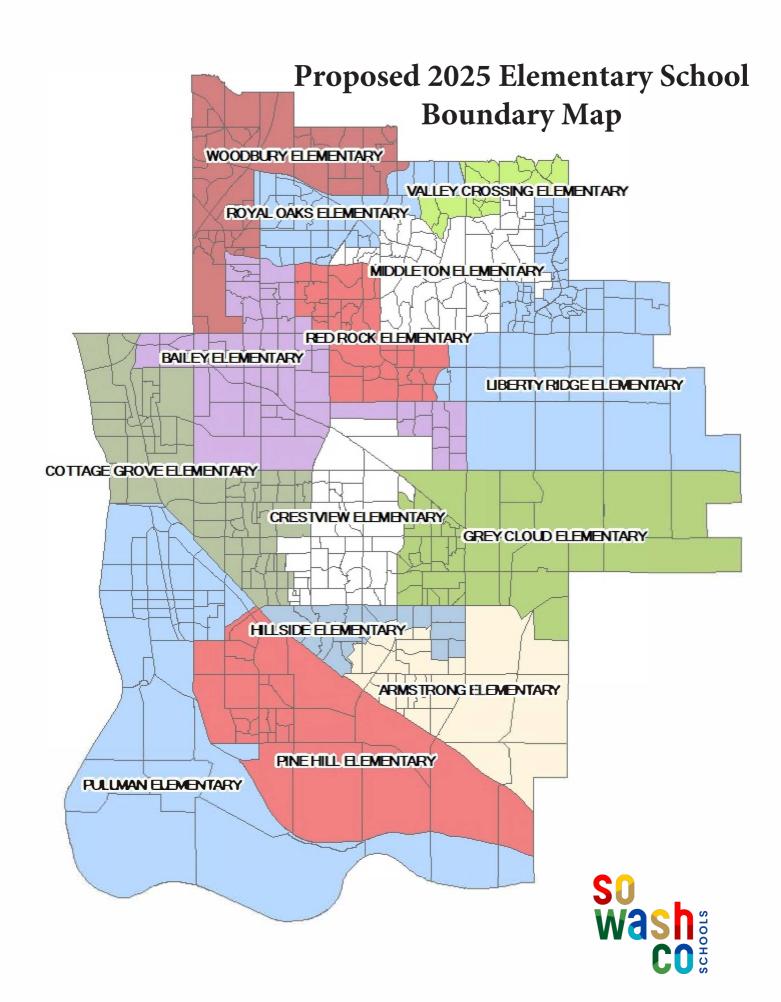

### **CREATION OF A 10-YEAR FACILITY PACKAGE THAT ADDRESSES:**

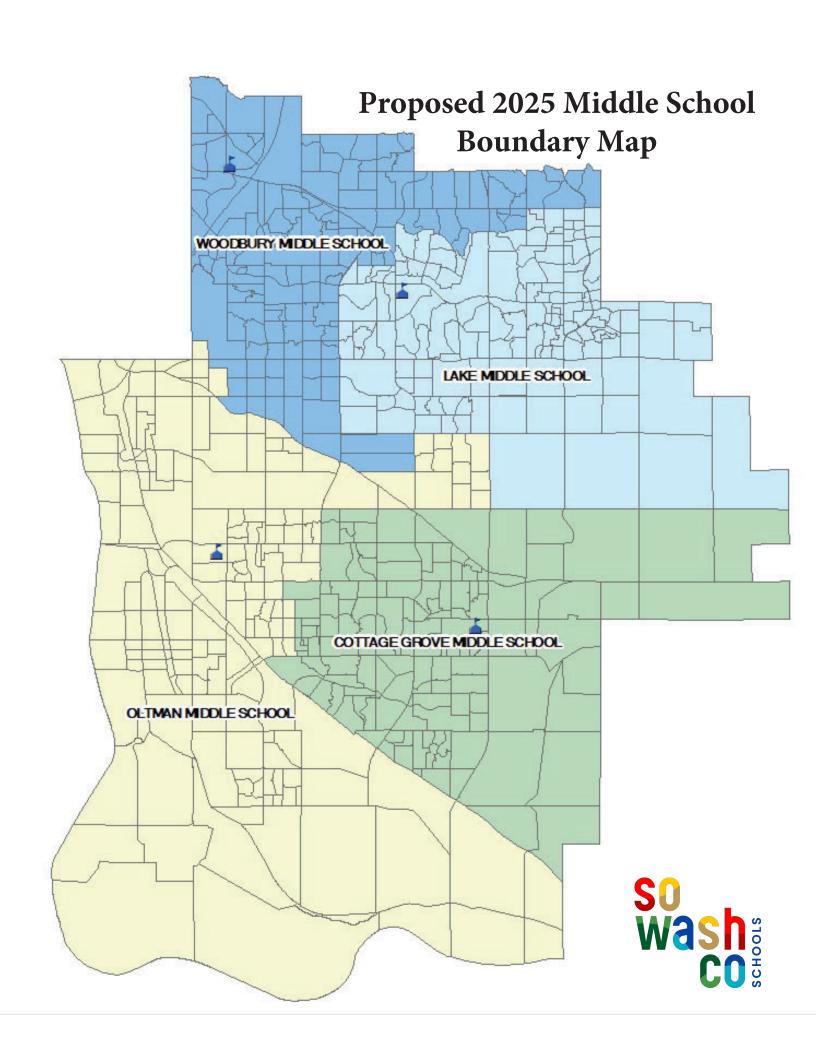

- Enrollment increases from new home construction or changing of boundaries
- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Transportation facility needs
- Alternative high school space
- Operational facility needs
- Early learning programming
- Special education programming
- How buildings/schools will be repurposed

### 10-YEAR FACILITY PACKAGE

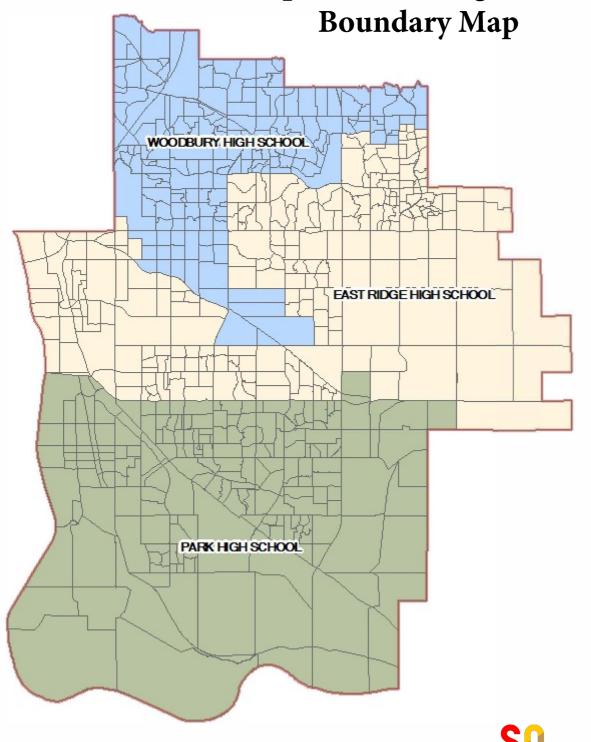

- Efficient use of current buildings
- Closure of an elementary building for transformation into an early learning site
- Build a centrally located elementary school
- Accommodate early learning, special education and community education programming
- Minimal changes to attendance boundaries
- Least amount of disruption to families
- Adhere to a 10-year facility plan as approved by the school board
- Acknowledge the tax impact on property owners
- Lay the groundwork for future growth (beyond 10 years)
- Current estimated cost is \$462.5 million

### South Washington County Schools, ISD No. 833

**April 13, 2022** 

Estimated Sources and Uses of Funds - Proposed School Building Bond

Bond Amount Estimated Project Costs	\$462,660,000 \$462,500,000
Sources of Funds	
Par Amount	\$462,660,000
Investment Earnings <sup>1</sup>	3,442,928
Total Sources	\$466,102,928
Uses of Funds	
Underwriter's Discount <sup>2</sup>	\$2,313,300
Legal and Fiscal Costs <sup>3</sup>	1,289,628
Net Available for Project Costs	462,500,000
Total Uses	\$466,102,928
Initial Deposit to Construction Fund	\$459,057,072

<sup>&</sup>lt;sup>1</sup> Estimated investment earnings are based on an average interest rate of 0.75% and an average life of 12 months.

<sup>&</sup>lt;sup>2</sup> The allowance for discount bidding is an estimate of the compensation taken by the underwriter who provides the lowest true interest cost as part of the competitive bidding process and purchases the bonds. Ehlers provides independent municipal advisory services as part of the bond sale process and is not an underwriting firm

<sup>&</sup>lt;sup>3</sup> Includes fees for municipal advisor, bond counsel, rating agency, paying agent, and county certificates.

- 1 Tax capacity values are final values for taxes payable in 2021 and 2022, with estimated percentage changes for later years as shown above.
- Initial debt service levies are set at 105 percent of the principal and interest payments during the next fiscal year.

  Initial debt service levies are set at 105 percent of the principal and interest payments during the next fiscal year.

  The debt excess adjustments for taxes payable in 2021 and 2022 are actual and for taxes payable in 2023 is based on addited debt service fund balance as of June 30, 2021. Estimates for future years are based on 4.5% of the prior years' total debt service levy.

  Lease levy amounts for future years are based on the best available estimates of future payments for all current and planned future leases.

  These estimates assume that the current Capital Project Levy would be renewed at the same tax rate when it expires.
- 6 For each of the Facilities Maintenance bond issues, interest payments due during the first year would be paid from funds on hand bond proceeds.

### PRELIMINARY INFORMATION - FOR REVIEW AND COMMENT

Industrial **	2,500,000	3,247	271				
	5,000,000	6,544	545				
_	\$500,000	\$659	\$55				
Apartments and	1,000,000	1,318	110				
Residential Non-Homestead	2,500,000	3,294	275				
	5,000,000	6,588	549				

<sup>\*</sup> Estimated tax impact includes principal and interest payments on the new bonds. Amounts are based on school district taxes for bonded debt levies only, and do not include tax levies for other purposes. Tax increases shown above are gross increases, not including the impact of the homeowner's Homestead Credit Refund ("Circuit Breaker") program. Owners of homestead property may qualify for a refund, based on their income and total property taxes. This would decrease the tax impact of the proposed bond issue for those property owners.

<sup>\*\*</sup> For commercial-industrial property, the estimates above are for property in the City of Woodbury. The tax impact for commercial-industrial property in other municipalities in the school district may be slightly different due to the varying impact of the Twin Cities Fiscal Disparities program.

# APPENDIX D: PROJECT COST SUMMARY

RESOL	UTION RELATING TO DETERMINING THE NECESSITY OF
ISSUIN	G GENERAL OBLIGATION BONDS AND CALLING A SPECIAL

BE IT RESOLVED by the School Board (the Board) of Independent School District No. 833 (South Washington County Schools), Minnesota (the School District) as follows:

It is hereby found, determined and declared as follows:

**ELECTION THEREON** 

- 1. The Board has investigated the facts and does hereby find, determine and declare that it is necessary and expedient to issue general obligation school building bonds of the School District in an aggregate amount not to exceed \$462,660,000 (the Bonds) for acquisition and betterment of school sites and facilities including, but not limited to, construction of two elementary schools, expansion of three high schools, improvements to facilities districtwide and land acquisition, pursuant to Minnesota Statutes, Chapter 475.
- 2. The projects described in paragraph 1 will be submitted to the Commissioner of Education of the State of Minnesota for Review and Comment. Said projects and such submission are hereby approved by this Board. The actions of the School District's administration in applying to the Minnesota Department of Education for the Commissioner's Review and Comment and taking such other actions as necessary to comply with the provisions of Minnesota Statutes, Section 123B.71, as amended, are hereby directed, authorized, approved and ratified in all respects. The Board's determination to hold the election to authorize the issuance of the Bonds is contingent upon receiving a favorable Review and Comment. When the Commissioner's favorable Review and Comment is received, the Clerk is authorized and directed to publish a summary of the Review and Comment in a legal newspaper of general circulation in the School District not less than twenty (20) nor more than sixty (60) days before the special election date and the School District will hold a public meeting on the Review and Comment prior to the date of the election.
- 3. The question on the issuance of the Bonds shall be submitted to the qualified electors of the School District at a special election, which is hereby called and directed to be held in conjunction with the state primary election on Tuesday, August 9, 2022, between the hours of 7:00 a.m. and 8:00 p.m.
- 4. Pursuant to Minnesota Statutes, Section 205A.11, the precincts and polling places for this special election are those precincts or parts of precincts located within the boundaries of the School District which have been established by the governing bodies located in whole or in part within the School District.

5. The Clerk is hereby authorized and directed to cause written notice of the special election to be: (a) provided to the County Auditor at least seventy-four (74) days before the date of the special election; (b) provided to the Commissioner of Education at least seventy-four (74) days before the date of the special election; (c) posted at the administrative offices of the School District, for public inspection, at least ten (10) days before the date of the special election; and (d) published in the official newspaper of the School District once each week for at least two consecutive weeks, with the last publication being at least one week before the date of the special election. The Notice of Special Election shall be prepared in substantially the following form:

#### NOTICE OF SPECIAL ELECTION INDEPENDENT SCHOOL DISTRICT NO. 833 (SOUTH WASHINGTON COUNTY SCHOOLS), MINNESOTA

NOTICE IS HEREBY GIVEN that a special election has been called and will be held in and for Independent School District No. 833 (South Washington County Schools), Minnesota, on August 9, 2022, between the hours of 7:00 a.m. and 8:00 p.m. to vote on the following question:

#### School District Question School Building Bonds

Shall the board of Independent School District No. 833 (South Washington County Schools), Minnesota be authorized to issue general obligation school building bonds in an amount not to exceed \$462,660,000 for acquisition and betterment of school sites and facilities including, but not limited to, construction of two elementary schools, expansion of three high schools, improvements to facilities districtwide and land acquisition?

### BY VOTING "YES" ON THIS BALLOT QUESTION, YOU ARE VOTING FOR A PROPERTY TAX INCREASE

The precincts and polling places for the special election will be the precincts and polling places used for the state primary election.

All qualified electors residing in said School District may cast their ballots at the polling places for the precincts in which they reside during the polling hours specified above.

A voter must be registered to vote to be eligible to vote in the special election. Unregistered individuals may register to vote at the polling places on election day.

Dated: April 21, 2022.	BY ORDER OF THE	E SCHOOL BOARD
	/s/	, Clerk

- 6. The Clerk is authorized and directed to acquire and distribute such election materials as may be necessary for the proper conduct of this special election. If an optical scan voting system is being used, the Clerk shall comply with the laws and rules governing the procedures and requirements for optical scan voting systems. The Clerk is authorized and directed to acquire and distribute such election materials and to take such other actions as may be necessary for the proper conduct of this special election and generally to cooperate with election authorities conducting any other elections on that date. The Clerk and members of the administration are authorized and directed to take such actions as may be necessary to coordinate this election with other elections, including entering into agreements with appropriate municipal and county officials regarding preparation and distribution of ballots or ballot cards, election administration, and cost sharing.
- 7. The Clerk is authorized and directed to cause a printed ballot for the question to be prepared in accordance with Minnesota Statutes, Section 205A.08, Subdivision 5 and the rules of the secretary of state for use at the special election. If an optical scan voting system is being used, the Clerk shall cause official ballots to be printed according to the format of ballots for optical scan voting systems provided by the laws and rules governing optical scan voting systems. The Clerk is further authorized and directed to cause a sample ballot to be posted in the administrative offices of the School District, for public inspection, at least four (4) days before the date of the special election and to cause two sample ballots to be posted at each polling place on the date of the special election and to cooperate with the proper election officials to cause ballots or ballot cards to be prepared for use at said election. The ballot shall be in substantially the following form, with such changes in form and instructions as may be necessary to accommodate the use of an optical scan voting system:

# Special Election Ballot School District Ballot Independent School District No. 833 (South Washington County Schools), Minnesota

#### **August 9, 2022**

#### **Instructions to Voters**

To vote, completely fill in the oval(s) next to your choice(s) like this:

To vote for a question, fill in the oval next to the word "Yes" for that question. To vote against a question, fill in the oval next to the word "No" for that question.

#### School District Question School Building Bonds

S YES NO

Shall the board of Independent School District No. 833 (South Washington County Schools), Minnesota be authorized to issue general obligation school building bonds in an amount not to exceed \$462,660,000 for acquisition and betterment of school sites and facilities including, but not limited to, construction of two elementary schools, expansion of three high schools, improvements to facilities districtwide and land acquisition?

### BY VOTING "YES" ON THIS BALLOT QUESTION, YOU ARE VOTING FOR A PROPERTY TAX INCREASE

OFFICIAL BALLOT

August 9, 2022

Judge			
Judge			

(The ballot is to be initialed by two judges)

- 8. If the School District will be contracting to print the ballots for this special election, the Clerk is hereby authorized and directed to prepare instructions to the printer for layout of the ballot. Before a contract in excess of \$1,000 is awarded for printing ballots, the printer shall, upon request, furnish in accordance with Minnesota Statutes, Section 204D.04 a sufficient bond, letter of credit or certified check acceptable to the Clerk in an amount not less than \$1,000 conditioned on printing the ballots in conformity with the Minnesota election law and the instructions delivered. The Clerk shall set the amount of the bond, letter of credit or certified check in an amount equal to the value of the purchase.
- 9. The individuals designated as judges for the state primary election shall act as election judges for this special election and shall conduct the special election at the various polling places in the manner prescribed by law.
- 10. The special election shall be held and the returns made and canvassed in the manner prescribed by law and the Board shall meet on a date between the third day, August 12, 2022, and the tenth day, August 19, 2022, after the special election for the purpose of canvassing the results thereof.
- 11. Pursuant to Minnesota Statutes, Section 205A.07, Subdivision 3a, the Clerk is hereby instructed to notify the Commissioner of Education of the results of the special election and to provide the certified vote totals for the ballot question in written form within fifteen (15) days after the results have been certified by the Board.
- 12. Pursuant to Minnesota Statutes, Section 211A.02, Subdivision 6, the Clerk is hereby instructed to make any campaign finance reports filed with the Clerk by campaign committees within seven (7) days after the special election available on the School District's web site as soon as possible, but no later than thirty (30) days after receipt of any such report. The Clerk is further instructed to provide the Campaign Finance and Public Disclosure Board with a link to the section of web site where such reports are made available. Such reports must remain available on the web site for four (4) years from the date first posted.

Upon vote being taken thereon, the following voted in favor thereof

and the following voted against the same:

whereupon the resolution was declared duly passed and adopted.

## APPENDIX G: SUPPLEMENTAL INFORMATION

## i: Informational Flyer

Community • Growth • Student Success

South Washington County Schools (SoWashCo Schools) is planning for the future to address community growth and student needs. Over the next 10 years, more than 3,500 potential new K-12 students are expected to move into the district. If we do nothing, current projections show that 15 schools will be over capacity and we will have a deficit of nearly 2,500 K-12 seats for students by 2031.

#### Within 10 Years We Project

8,000 **NEW HOMES** 

3,500 **NEW STUDENTS** 

15 SCHOOLS OVER **CAPACITY** 

#### The 10-year facility plan seeks to address community growth through:

- Using current buildings efficiently
- Building a centrally-located elementary school
- Investing in our current high schools
- Repurposing existing buildings for other uses
- Accommodating early learning, special education and community education programming
- Minimal boundary changes
- Providing the least amount of disruption to families

If a bond election is successful, large construction and attendance boundary changes would go into effect no earlier than fall 2025. The current estimate for construction is \$462 million which is approximately \$23 a month for a \$300,000 home.

#### WHAT'S A BOND ELECTION?

- A bond referendum gives voters the opportunity to decide if SoWashCo Schools should be authorized to raise construction funding through the sale of bonds.
- Bonds allow the district to borrow money that it then pays back over time and is the only method to raise enough funds for new construction.
- If approved by the school board, the ballot question is tentatively planned for a vote during a special election on Aug. 9, 2022.
- Construction funding does not take away from education funding.

#### WHAT IF THE BOND DOES NOT PASS?

- Earliest election to return to voters is Feb. 2023
- Moderate to extensive attendance boundary changes would occur prior to 2025
- Explore temporary portable trailers at some school sites
- Consider alternative scheduling options for high schools
- Review grade configurations at all levels
- Increase in rental space for learning and instruction
- Higher than average class sizes remain in overcrowded schools
- Begin alternative long-range facility planning

# ii: Community Presentation & Board Report

**1 Facility Package** 

10-Year Plan

2025

### Within 10 Years We Project

8,000 NEW HOMES

3,500 NEW STUDENTS

15 SCHOOLS OVER CAPACITY

### Results

#### **BOARD-APPROVED GOALS**

Creation of a **10-year facility plan** that addresses:

- Enrollment increases from new construction or changing of boundaries
- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Transportation facility needs
- Alternative high school space
- Operational facility needs
- Early learning programming
- Special education programming
- How buildings/schools will be repurposed

### Results

#### **BOARD-APPROVED GOALS**

Creation of a **10-year facility plan** that addresses:

- Creation of a funding plan to address the costs of the 10-year facility plan which will include bonding, lease levies, and long-term facility maintenance revenue.
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

### 10-Year Plan

**LONG-RANGE FACILITY PACKAGE** 

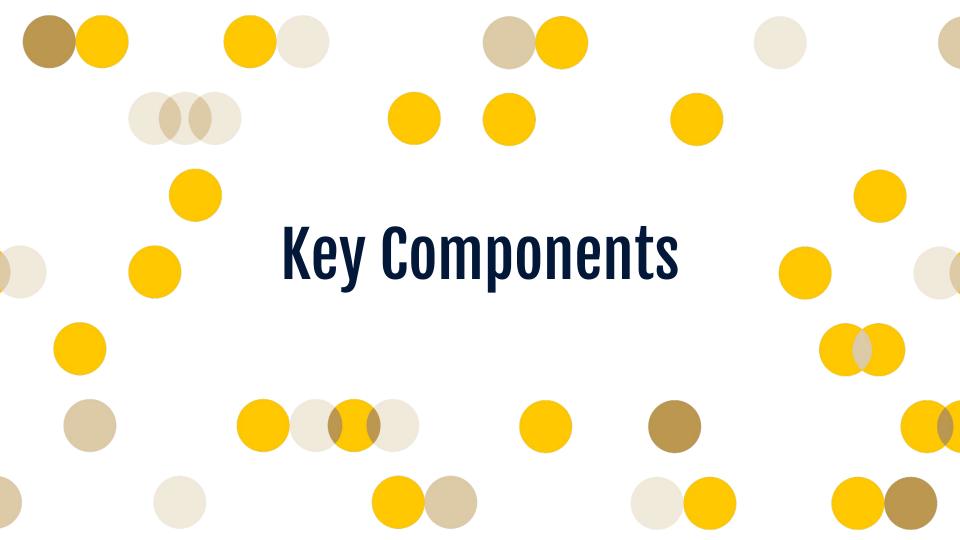

### **Plan Summary**

# Wash story

### 10-YEAR FACILITY PACKAGE

- Efficient use of current buildings
- Closure of an elementary building for transformation into an early learning site
- Build a centrally located elementary school
- Accommodate early learning, special education and community education programming
- Minimal changes to attendance boundaries
- Least amount of disruption to families
- Adhere to a 10-year facility plan as approved by the school board
- Acknowledge the tax impact on property owners
- Lay the groundwork for future growth (beyond 10 years)

Construction of a new 1000 seat school in a more central district location

Keep the current school community together

Expand the current attendance boundary

Transform current **Crestview Elementary** building for the **South Washington Alternative High School** with space for adult basic education

The **Park High School** campus will be extended into the current **Crestview Elementary** campus.

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Alternative high school space
- Early learning programming
- Special education programming
- How buildings/schools will be repurposed
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

**Crestview Elementary - Attendance Boundaries** 

Attendance boundary is removed from Bailey Elementary and is added to Crestview Elementary

Attendance boundaries modified for attendance at nearby Woodbury Elementary, Cottage Grove Elementary and Bailey Elementary

Transform current **Newport Elementary** building for a new **SoWashCo Schools Early Childhood Learning Center** 

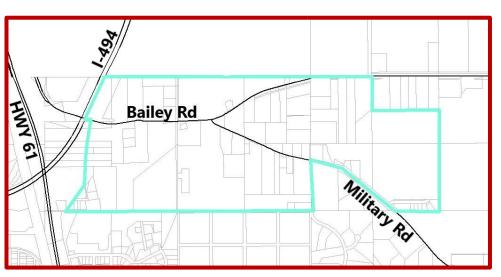

- Early learning programming
- How buildings/schools will be repurposed
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

### **Newport Elementary - Attendance Boundaries**

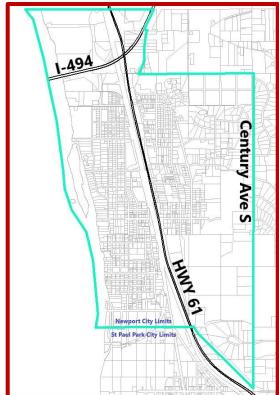

Attendance boundary is removed from Newport Elementary and moves to Bailey Elementary

Newport Elementary - Attendance Boundaries

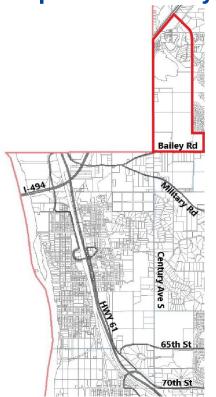

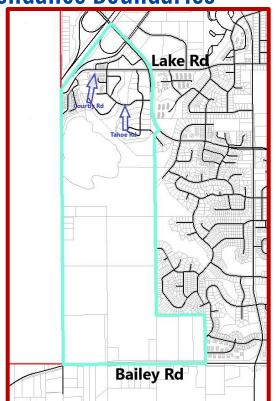

Attendance boundary is removed from Newport Elementary and moves to Cottage Grove Elementary

Newport Elementary - Attendance Boundaries

Attendance boundary is removed from Newport Elementary and moves to Woodbury Elementary

Renovation to create shared learning space

Construction of new bathrooms in early learning and special education rooms

- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Early learning programming
- Special education programming
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

Construction of a new classroom addition

Construction of a new larger cafeteria and kitchen

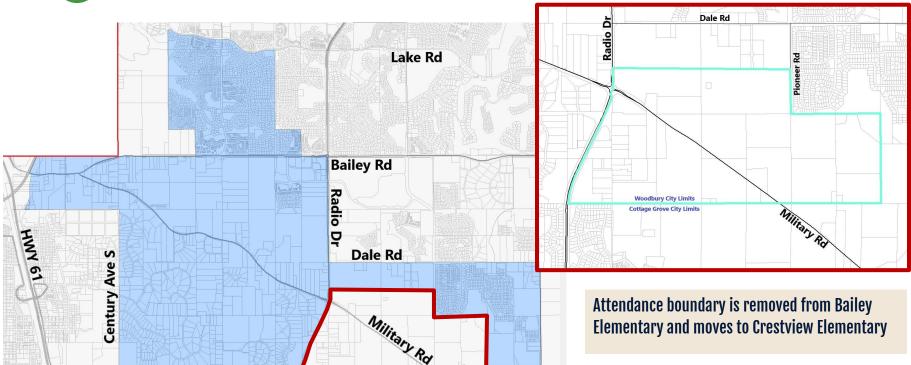

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

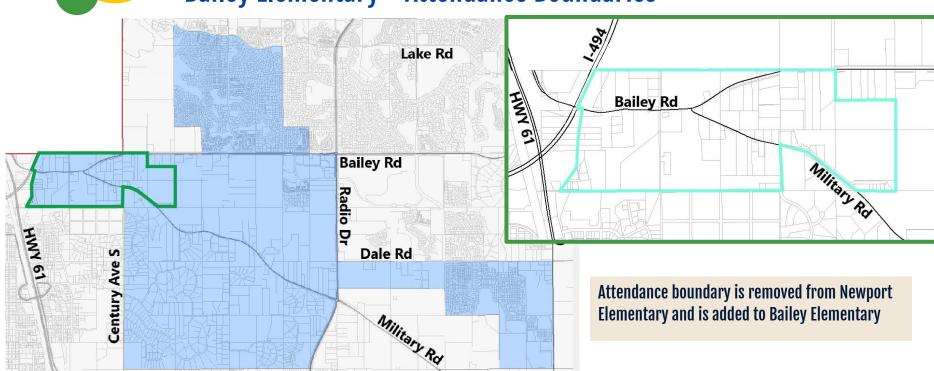

Bailey Elementary - Attendance Boundaries

**Bailey Elementary - Attendance Boundaries** 

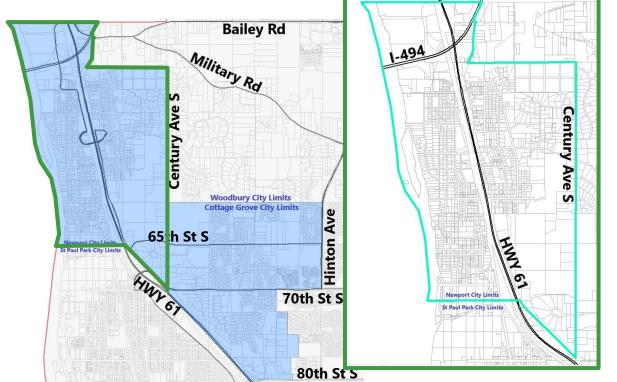

- Modernization of classroom space
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

**Cottage Grove Elementary - Attendance Boundaries** 

Attendance boundary is removed from Newport Elementary and is added to Cottage Grove Elementary

Construction of new special education classrooms

Construction of a new larger cafeteria and kitchen

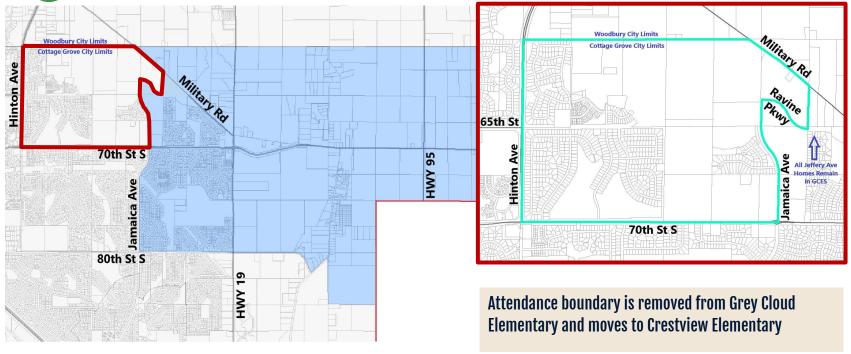

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Special education programming
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

**Grey Cloud Elementary - Attendance Boundaries** 

Renovation of early learning and special education spaces

Renovation to create shared learning space

Renovation of kitchen

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Early learning programming
- Special education programming
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

Construction of a new classroom addition

- Modernization of classroom space
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

Renovation of early learning and special education spaces

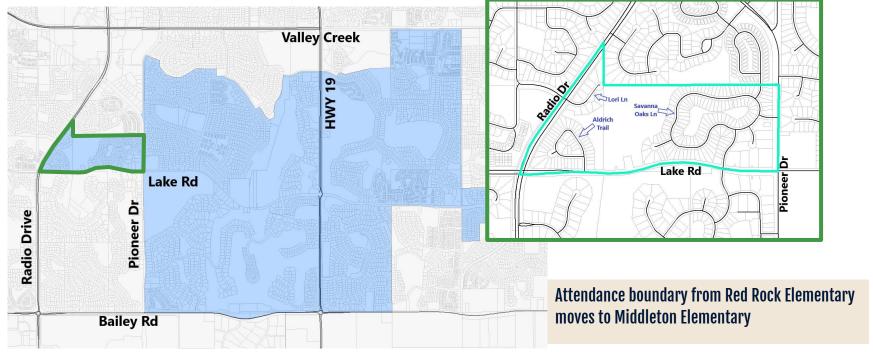

- Curriculum and/or Instructional delivery methods
- Early learning programming
- Special education programming
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

### Middleton Elementary - Attendance Boundaries

General maintenance projects

Replace current building with a new **Pine Hill Elementary** (850 seats) on site

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Early learning programming
- Special education programming
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

Renovation of early learning and special education spaces

Renovation to create shared learning space

Renovation of kitchen

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Early learning programming
- Special education programming
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

Renovation of kindergarten and special education spaces

- Modernization of classroom space
- Special education programming
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

### **Red Rock Elementary – Attendance Boundaries**

Dale Rd

Attendance boundary is removed from Red Rock Elementary and moves to Middleton Elementary

Renovation of early learning and special education spaces

Renovation to create shared learning space

Renovation of kitchen

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Early learning programming
- Special education programming
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

General maintenance projects

Renovation to create shared learning space

Renovation of early learning and special education spaces

Renovation of kitchen

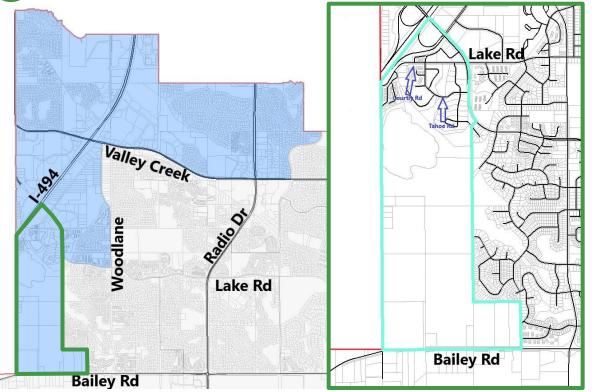

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Early learning programming
- Special education programming
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

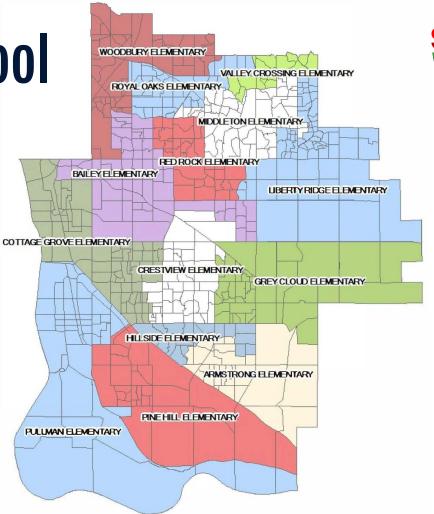

**Woodbury Elementary - Attendance Boundaries** 

Attendance boundary from Newport Elementary School moves to Woodbury Elementary School **Elementary School** 

**Attendance Boundaries** 

Existing **Liberty Ridge Site II** continues as an early learning center

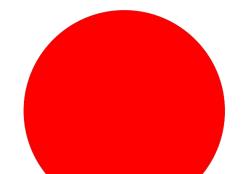

**Newport Elementary School** building converted to an early learning center

- Modernization of classroom space
- Early learning programming
- How buildings/schools will be repurposed
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

### Discussion

Construction of a new secure entry

Renovation of kitchen serving line

Student capacity approximately 1,400

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

Construction of a new classroom addition

Construction of a new secure entry

Renovation of kitchen serving line

Student capacity approximately 1,400

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

Construction of a new classroom addition (originally built for expansion)

Expansion of cafeteria (originally built for expansion)

Student capacity approximately 1,400

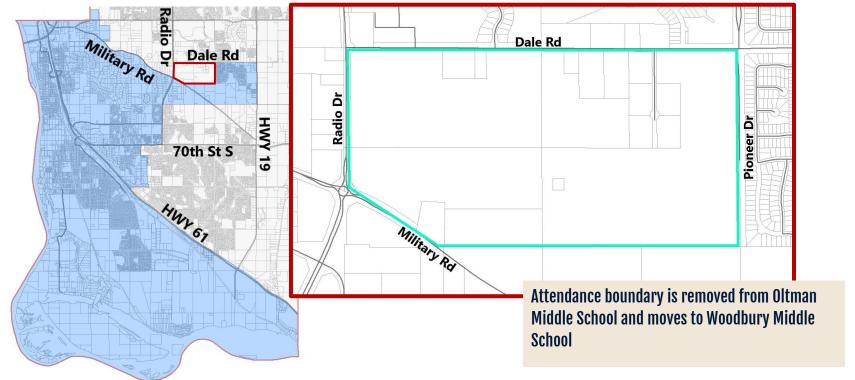

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

### **Oltman Middle School - Attendance Boundaries**

Construction of a new music room

Construction of a new secure entry

Renovation of existing space to expand capacity, including new art and Science, Technology, Engineering and Math (STEM) classrooms

Expansion of kitchen serving area

Student capacity approximately 1,400

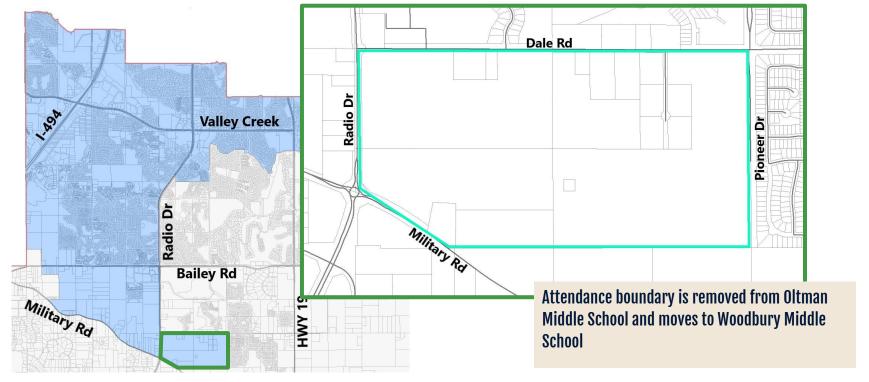

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

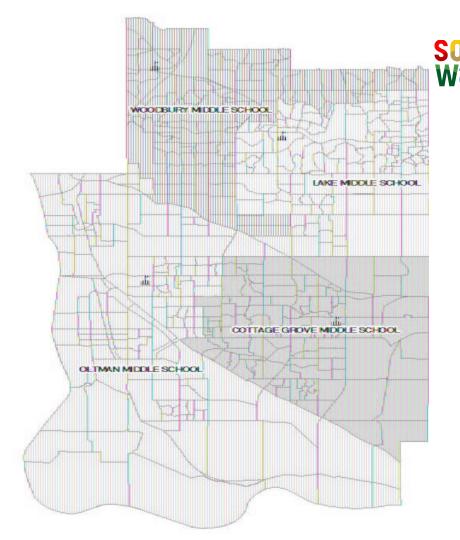

**Woodbury Middle School - Attendance Boundaries** 

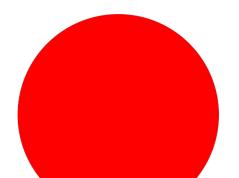

## Middle School

**Attendance Boundaries** 

## Discussion

Construction of a new classroom addition (originally built for expansion)

Expansion of the cafeteria and kitchen serving area

Construction of additional spaces for Career and Technical Education (CTE) and Science, Technology, Engineering and Math (STEM), including robotics space

Creation of a multipurpose space for online learning

Student capacity approximately 2,400 with potential for future expansion

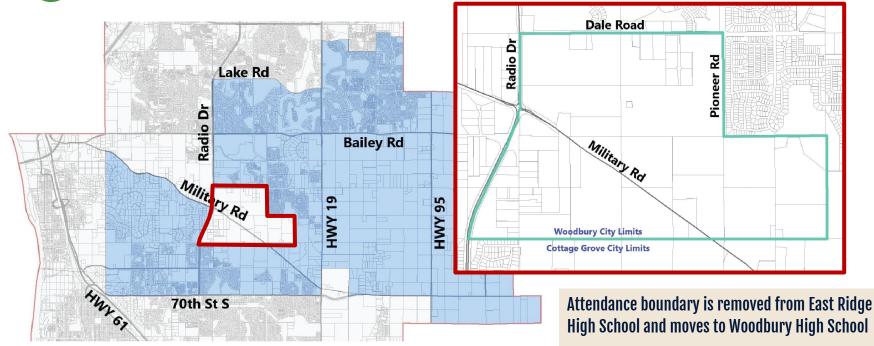

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

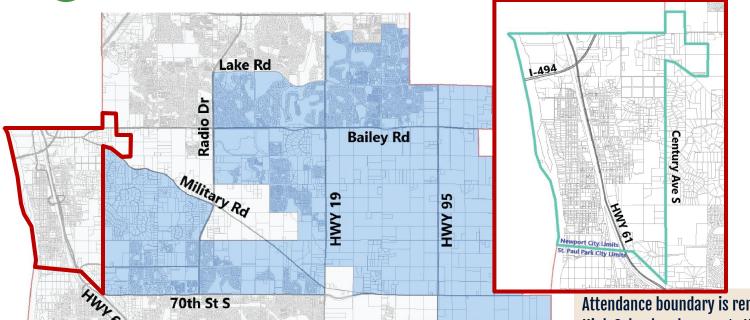

East Ridge High School - Attendance Boundaries

**East Ridge High School - Attendance Boundaries** 

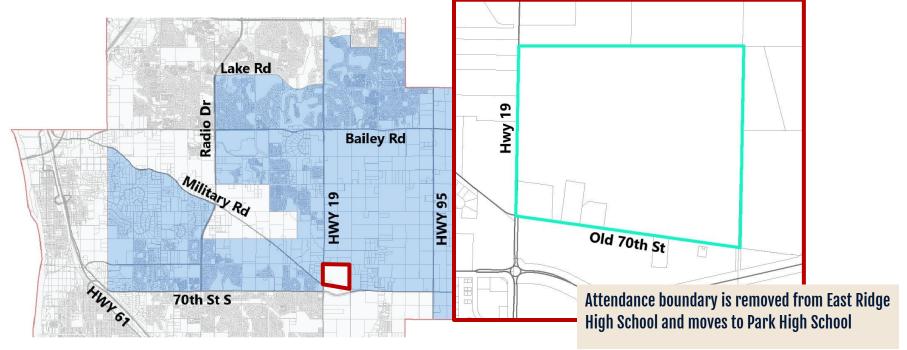

Attendance boundary is removed from East Ridge High School and moves to Woodbury High School

East Ridge High School - Attendance Boundaries

Construction of a new classroom addition

Construction of a new cafeteria and kitchen

Renovation and expansion of Career and Technical Education (CTE) and Science, Technology, Engineering and Math (STEM), including robotics space

Renovation to create a centralized student services area

Creation of a multipurpose space for online learning

Complete site redesign to form a larger campus with additional parking, improved athletic fields, increased greenspace, improved traffic flow and increased pedestrian safety

Student capacity approximately 2,400 with potential for future expansion

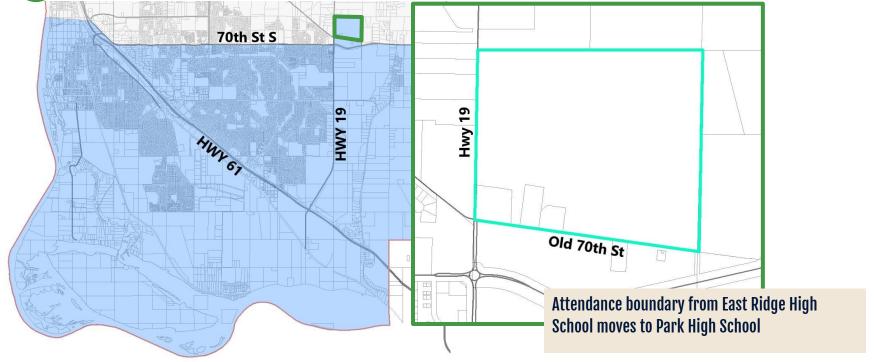

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

# Building our Future Park High School - Attendance Boundaries

### **South Washington Alternative High School - Projects**

Renovate existing **Crestview Elementary** building into the new **South Washington Alternative High School** 

Allows expansion of **Park High School** campus to work with the new **South Washington Alternative High School** campus

Construction of Career and Technical Education (CTE) and Science, Technology, Engineering and Math (STEM) spaces

Provides access to athletic fields and outdoor greenspace

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Alternative high school space
- How buildings/schools will be repurposed
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

# **Building our Future**Woodbury High School - Projects

Construction of a new classroom addition

Construction of a new cafeteria and kitchen

Renovation and expansion Career and Technical Education (CTE) and Science, Technology, Engineering and Math (STEM), including robotics space

Construction of new secure front entry and student services area

Creation of a multipurpose space for online learning

Building redesign, renovation and classroom/department realignment to reduce hallway crowding and increase building flow

Complete site redesign to improve traffic flow and increased pedestrian safety

Student capacity approximately 2,400 with potential for future expansion

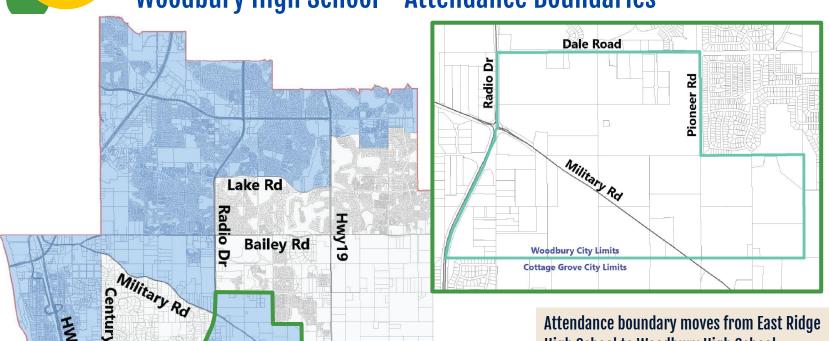

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Early learning programming
- Special education programming
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

**Woodbury High School - Attendance Boundaries** 

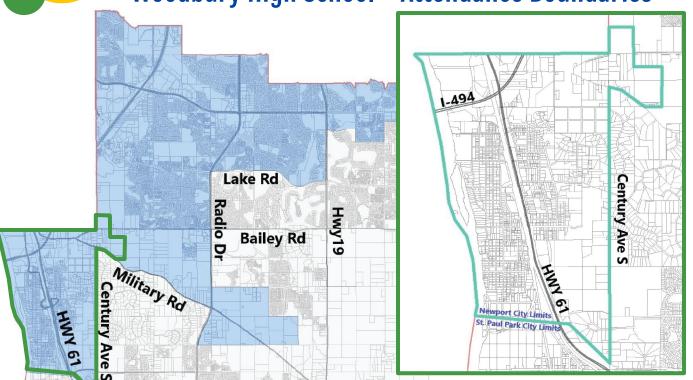

High School to Woodbury High School

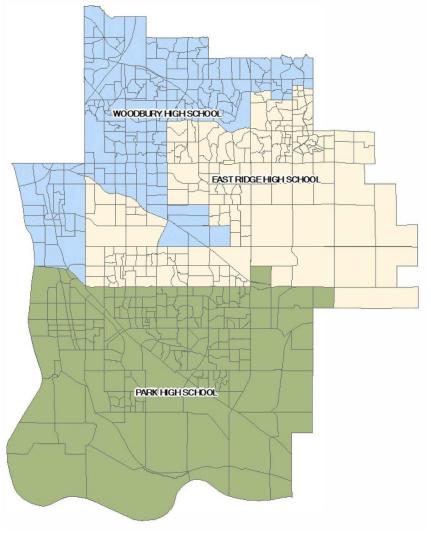

**Woodbury High School - Attendance Boundaries** 

Attendance boundary moves from East Ridge High School to Woodbury High School

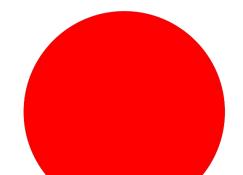

# High School Attendance Boundaries

## Discussion

**BOARD-APPROVED GOALS ADDRESSED** 

Sell building

• Alternative high school space

Construction of a centrally-located **District Service Center** on new **Crestview Elementary** campus to consolidate support staff, community education, enrollment services and space for meetings and professional development

Renovate current building to retain operational facilities (warehouse, storage, etc.)

Renovate current building for **Next Step and Pathways** transition programming (18-21) to remain near business and commerce

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Operational facility needs
- Special education programming
- How buildings/schools will be repurposed
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

Renovate **Central Park** for use by SoWashCo Online, adult basic education and special education

Non-renewal of lease for **Next Step** transition program and relocate program to renovated District Service Center building

Non-renewal of lease for **Pathways** transition program and relocate program to renovated District Service Center building

- Modernization of classroom space
- Needed renovations (such as bathrooms, kitchens, cafeterias, etc.)
- Curriculum and/or Instructional delivery methods
- Special education programming
- How buildings/schools will be repurposed
- Creation of learning spaces that support:
  - College and career ready students by providing flexible, adaptive spaces for learning
  - Environments that inspire social interactions
  - Diverse instructional styles and accommodate multiple forms of collaboration

### Current transportation site remains

Construction of a satellite transportation space for additional school bus parking

- Transportation facility needs
- Operational facility needs

Purchase 120-160 acres of land for future use

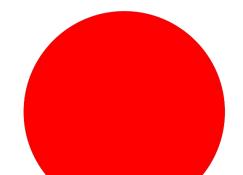

### **BOARD-APPROVED GOALS ADDRESSED**

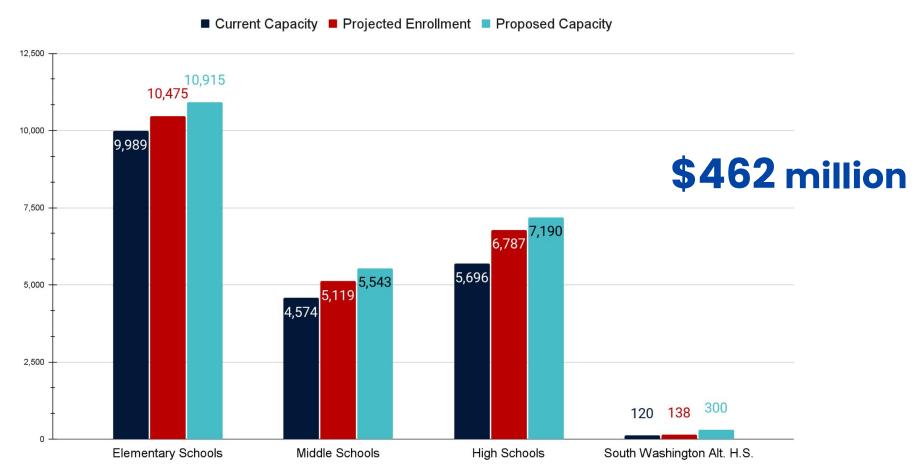

• Enrollment increases from new home construction or changing of boundaries

## Discussion

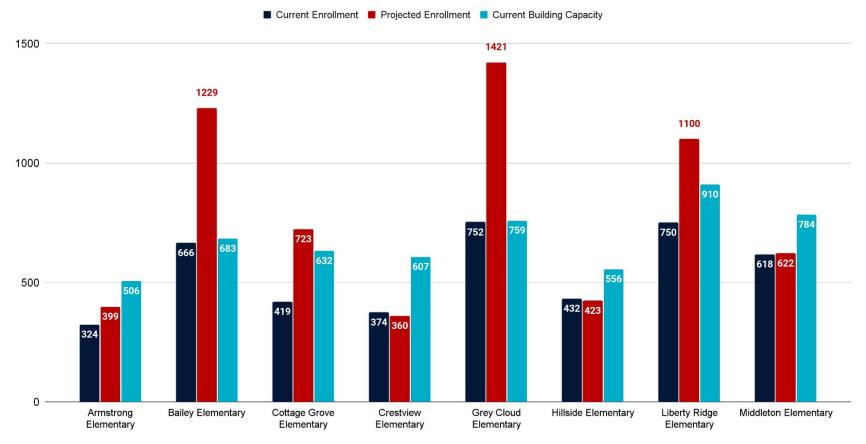

## Package Total

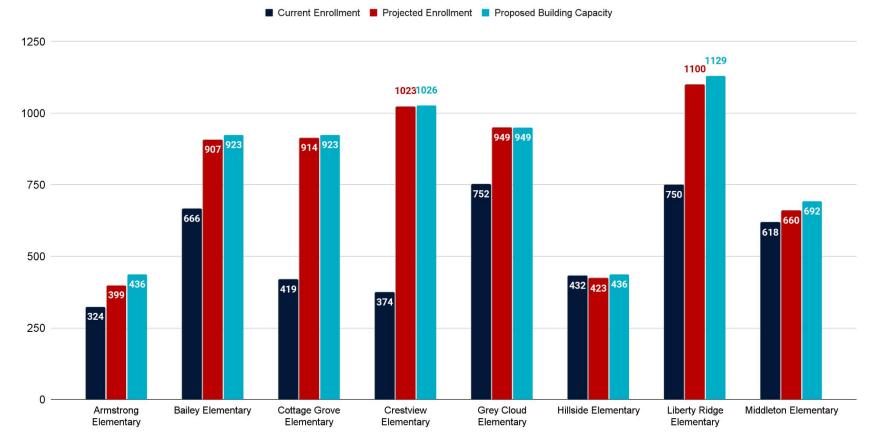

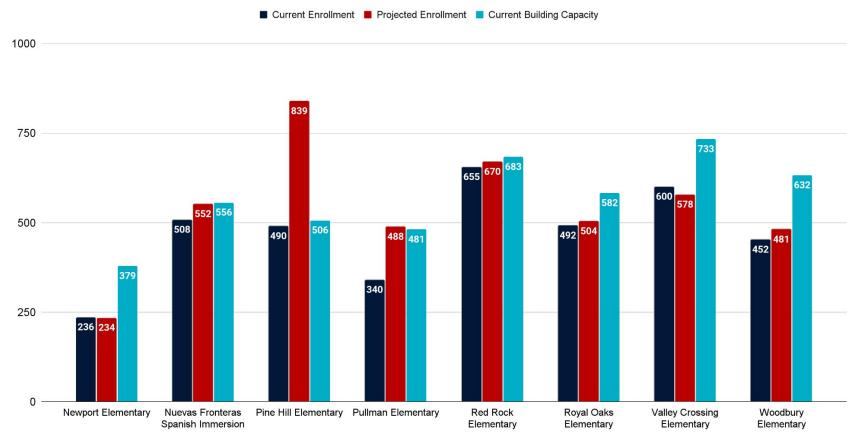

## If We Did Nothing - 10-year Projected Student Enrollment

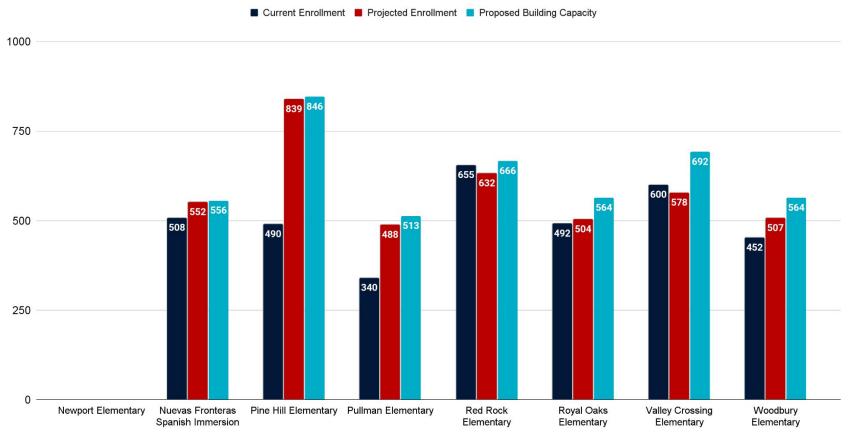

## If Approved - 10-year Projected Student Enrollment and Capacity

#### **Middle Schools**

#### If We Did Nothing - 10-year Projected Student Enrollment

**High Schools** 

#### If Approved – 10-year Projected Student Enrollment

**High Schools** 

### Thank You Voters

A bond referendum gives voters the opportunity to decide if South Washington County Schools should be authorized to raise construction funding through the sale of bonds.

Bonds allow the District to borrow money that it then pays back over time.

This is the only method to raise enough funds for new construction.

Election proposed for Aug. 9, 2022

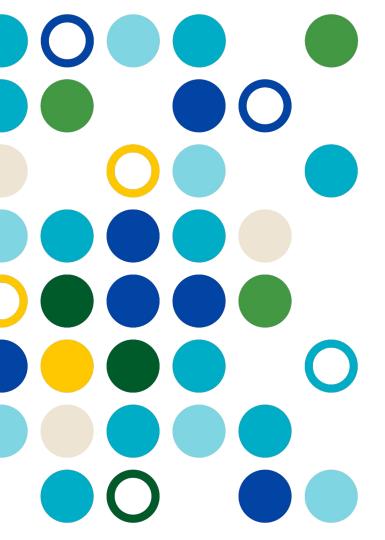

#### **BOARD-APPROVED GOALS ADDRESSED**

 Creation of a funding plan to address the costs of the 10-year facility plan which will include bonding, lease levies and long-term facility maintenance revenue.

Construction funding does not take money away from education funding.

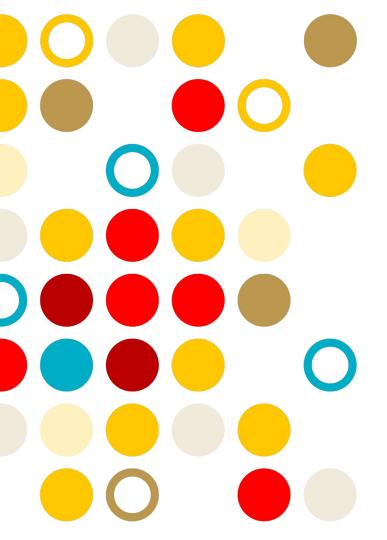

#### What if the Bond Does Not Pass?

AUG. 9, 2022

- Earliest election to return to voters is Feb. 2023
- Moderate to extensive attendance boundary changes prior to 2025
- Explore temporary portable trailers at some school sites
- Consider alternative scheduling options for high schools
- Review grade configurations at all levels
- Increase rental space for learning and instruction
- Higher than average class sizes remain in overcrowded schools
- Begin alternative long-range facility planning

- Gather feedback from the long-range facility task force
- Hold community and staff information sessions
- Gather feedback from district advisory groups
- Present final plan for approval in April

#### **Information Sessions**

#### **COMMUNITY INFORMATION SESSIONS**

- In-person:
  - o 6-7:30 p.m., March 15
  - Oltman Middle School
  - 6625 Goodview Ave. S., Cottage
     Grove
- **Virtual:** 5:30-7 p.m., March 17

#### STAFF INFORMATION SESSIONS

- **Virtual:** 12-1:30 p.m., March 14
- **Virtual:** 5:30-7 p.m., March 22
